Acknowledgements

The Louisiana Career Planning Guide is a collaborative effort between the Louisiana Community and Technical College System (LCTCS), the Louisiana Department of Education (DOE), the Louisiana Board of Regents (BOR), and the Louisiana Workforce Commission (LWC) to link the Academic and Career and Technical Education programs at the secondary and postsecondary levels to increase student achievement.

**Project Leader:** Melba Kennedy, State Coordinator, Secondary to Postsecondary Transitions
Louisiana Community and Technical College System

**Project Team:**
- Dr. Lisa S. Vosper, Associate Commissioner for Workforce Education & Training
Louisiana Board of Regents
- Dr. James R. “Jim” Owens, Deputy Director of College and Career Readiness
Louisiana Department of Education
- Johnny Riley, Director of Workforce Development
Louisiana Workforce Commission

**Special Thanks**
- Amy Holcomb, Graphic Designer, Louisiana Workforce Commission
- Patricia Lopez-Granier, Labor Market Specialist Manager, Research & Statistics, Louisiana Workforce Commission
- Kizzy Payton, Director of Public Information, Louisiana Community and Technical College System
- Dr. Paul Theriot, Section Supervisor, Career & Technical Education, Louisiana Department of Education
- Erica Wells, Graphic Designer, Louisiana Community and Technical College System
- Sonya Williams, Executive Staff Officer, Louisiana Workforce Commission
- Rosalynn Wilson, Postsecondary Education Planning Specialist, Louisiana Board of Regents

Dear Students, Parents, and Educators:

We are pleased to present the Louisiana Career Planning Guide for educational preparation using Career Clusters. Career Clusters are groupings of occupations/career specialties that are used as an organizing tool for curriculum and instruction. This guide is designed as a tool to assist students at all levels in choosing the classes they need not only to graduate, but ultimately gain employment in a high-skill/wage or high-demand job in targeted sectors within the regions.

To support these efforts, we want to ensure that students and their parents have the most timely and accurate information available to help students make informed decisions about their educational path and career choices. In line with the College and Career Ready Core graduation requirements and the Career Diploma requirements, areas of concentration based on Career Clusters will become increasingly relevant. Each Career Cluster and its related pathways requires a common set of knowledge and skills for career success, which provides a foundation that prepares students for a full range of occupations and career specialties, focusing on a blend of technical, academic, and employability knowledge and skills.

The economy and workforce of Louisiana are constantly changing. In today’s world, prospective workers require training and retraining throughout their lifetime. The Louisiana Board of Regents, the Louisiana Community and Technical College System, the Louisiana Department of Education, and the Louisiana Workforce Commission are committed to supporting the workforce needs of our state. This guide will assist students, teachers, guidance counselors, faculty, and job seekers in identifying the available career options and help them make career decisions that are led by their interests, clearly defined pathways, and timely employment projections that meet the needs of Louisiana’s economy.

Sincerely,

Artis L. Terrell, Jr.
Chairman
Louisiana Board of Regents

Joe D. May
President
Louisiana Community and Technical College System

Paul G. Pastorek
Superintendent
Louisiana Department of Education

Executive Director
Louisiana Workforce Commission
How to Use This Guide

Whether you are planning for high school, college, the workforce, or a career change, the Louisiana Career Planning Guide will help you determine a path to reach your academic and career goals. Inside this guide, you will learn about your career interests, find Career Clusters that are related to those interests, and be able to review lists of Louisiana’s top high-wage, high-demand jobs in each cluster.

Throughout this guide, you also will find interviews with people like you who are preparing for and working in a cluster-related career in Louisiana. Along with other useful information, the guide will help you create a realistic career plan based on your interests and goals. To access that information, simply take the following steps:

Step One
Review the “Glossary” beginning on page 122. Knowing these terms and definitions will help you complete the steps that follow.

Step Two
Complete “Discover Your Career Personality,” the interest inventory that begins on page 4. The results will help you find Career Clusters and occupations that interest you – the foundation for planning your career future.

Step Three
Explore Career Clusters you would like to pursue on pages 14-111. The table of contents will lead you to the particular clusters you want to review. In each of the 16 Career Cluster sections, you will find educational requirements, total annual demand, and average hourly wages for high-demand jobs in Louisiana.
Step Four
If you are interested in a career that is nontraditional for your gender, read “Am I a Ground Breaker?” on pages 12 and 13. Then consider the benefits of pursuing whatever career is right for you.

Step Five
Are you a high school student? Be sure to go to pages 8-9 to review and then access LAePortal.com. Also review “Create an Individual Graduation Plan” on pages 112-115 for state graduation requirements.

Step Six
Learn more about “Career and Technical Student Organizations” on pages 116 and 117.

Step Seven
Are you a high school student or an adult returning to school? Review “State Web Sites and Resources” on pages 118 and 119.

Step Eight
To help map out your educational plan, review “Education Map” on pages 120-121. Also find Regional Business & Career Solutions Center locations on page 126.

Step Nine
Find lists of high-demand, high-wage jobs in eight Louisiana regions on page 127.
Discover Your Career Personality

The purpose of this career interest survey is to help you discover your “career personality” and some jobs you really might enjoy.

What’s a career interest survey? It’s a simple self-test. This one is based on the Holland Codes. There are no wrong answers!

The quiz begins on the next page. Take it to discover your interests. Simply follow these steps:

1. **Check activities that you like.**
   In part 1, read through the list of activities. Then check the ones that interest you.

2. **Add up your scores.**
   In part 2, total your scores. You’ll begin to see your career personality emerge. It’s important to consider your career personality when planning for the future.

3. **Evaluate yourself.**
   In part 3, you may find that you have more than one career personality. That’s okay. Most people do.

4. **Think about the future.**
   In part 4, on pages 6 and 7, you will find careers related to your personality. You are not limited to jobs just within your personality group. Check out career choices within the other personality types. You might be surprised at your career options!

**What Are Career Clusters?**

Some people are interested in health care. Other people are interested in information technology. Interests like these have been grouped into what’s called “Career Clusters.” The term describes knowledge, skills, and interests that connect with industries, jobs, and educational programs.

Louisiana groups careers into 16 Career Clusters. This survey and the information that follows relate to jobs in these 16 clusters.

You will find Career Clusters useful as you look for industries, career fields, and jobs you may like or an educational program you may want to pursue.
1. **Check Activities You Like.**

Place a check by the activities that interest you. Don’t worry if you don’t know much about them. Right now it’s just important to identify the activities that capture your imagination.

- [ ] 1. Save a rainforest or grow organic vegetables
- [ ] 2. Solve complicated math problems
- [ ] 3. Act in a movie, play, or television show
- [ ] 4. Work with people in different cultures and societies
- [ ] 5. Research news stories and do interviews for the evening news
- [ ] 6. Study the economy and predict economic trends
- [ ] 7. Read and use “how-to” manuals
- [ ] 8. Perform science experiments in a laboratory
- [ ] 9. Manage an art gallery
- [ ] 10. Conduct a religious service
- [ ] 11. Bargain with vendors at a flea market
- [ ] 12. Analyze and create statistical graphs and charts
- [ ] 13. Build cabinets or furniture
- [ ] 14. Study the environmental impact of pollution or global warming
- [ ] 15. Write a movie or television script
- [ ] 16. Volunteer to lead a club or scout troop
- [ ] 17. Choose and purchase merchandise to sell in a store
- [ ] 18. Work in a corporate office
- [ ] 19. Operate heavy machinery
- [ ] 20. Play chess or games of strategy
- [ ] 21. Write articles for music, art or entertainment magazines
- [ ] 22. Organize an event for a charity or community organization
- [ ] 23. Compete with other salespeople in a fast-paced, high-pressure company
- [ ] 24. Design computer programs and/or games
- [ ] 25. Work outdoors patrolling or maintaining a national park
- [ ] 26. Research legal statutes for a lawsuit
- [ ] 27. Play a musical instrument
- [ ] 28. Work with infants or children
- [ ] 29. Run for political office
- [ ] 30. Work an after-school job to save money
- [ ] 31. Set up a home theater system or install a car stereo system
- [ ] 32. Read science fiction
- [ ] 33. Write a short story, play, or novel
- [ ] 34. Host and entertain guests at a party
- [ ] 35. Work in a politician’s office
- [ ] 36. Enter information into a computer spreadsheet
- [ ] 37. Build a model of a jet aircraft
- [ ] 38. Study bacteria using an electron microscope and other high-tech equipment
- [ ] 39. Design a new line of clothes
- [ ] 40. Read and discuss a book or poem
- [ ] 41. Sit on a television panel to discuss political or social issues
- [ ] 42. Keep accurate accounting and sales records for a business
- [ ] 43. Repair a car or motorcycle motor
- [ ] 44. Identify different planets, stars, and constellations
- [ ] 45. Create and fire a ceramic pot or vase
- [ ] 46. Work with the elderly
- [ ] 47. Sell products for a portion of the profit
- [ ] 48. Create and oversee a budget for a large company or government agency

2. **Add Up Your Scores.**

On the grid below, circle the numbers you checked off. Count the number of circles in each row, and write that total in the blank space at the end of each line. These are your scores for each “career personality” type.

<table>
<thead>
<tr>

3. **Evaluate Yourself.**

In the spaces below, write the names of the two personality types in which you received the highest scores.
### Think About The Future.

Look at headlines “a” through “f” at the top of these two pages. Circle the ones that match your top two personality types from page 5. Now, look at the job titles listed below your personality types. Circle jobs you find interesting. Then circle related career clusters. Don’t think you’re limited only to jobs within your “job personality.” For example, if you’re a “Helper” with an interest in “Health Science,” check out Health Science career options within the other job personality types. You might be surprised at what you find.

#### a. Realist

Realists typically are focused, rugged, mechanical, and direct. Often athletic, they enjoy working outdoors with tools, animals, and plants. Famous “Realists” include primatologist Jane Goodall, hair stylist Vidal Sassoon, and architect Paul Williams.

#### b. Investigator

Investigators are curious and observant, and they like to research, analyze, and solve problems. Many enjoy science and math – working independently and in teams. Famous “Investigators” include physicist and chemist Marie Curie, anthropologist Margaret Mead, and forensic scientist Dr. Henry Lee.

#### c. Artist

Creative and imaginative, artists often work best in unstructured environments using words, pictures, music, and dance to create products and communicate ideas. Famous “Artists” include dancer Gregory Hines, painter Salvador Dali, and playwright William Shakespeare.

For Your Information ...

What is contained on the following pages of the *Louisiana Career Planning Guide* provides information about Jobs in Demand with High Wages in Louisiana and Top Employing Industry Sectors; Career Pathways/Areas of Concentration; Postsecondary Programs; and Industry-Based Certifications. This information is included for each of the 16 Career Cluster areas and is defined below.

**Industry Sectors**
Industry sectors are a subset of a market, industry, or economy whose components share similar characteristics. Industry sectors are broken up into different interrelated categories and are sometimes broken down further into subsectors. For example, Health Care is an industry sector, and the allied health field of radiology may be an example of a subsector.

**Career Pathway/Areas of Concentration**
A Career Pathway/Area of Concentration is defined as a coherent sequence of courses or a field of study that prepares a student for a first job and/or further education and training. Career Pathways/Areas of Concentration also:

- Integrate academic and occupational learning, integrate school-based and work-based learning, and establish linkages between high schools and postsecondary institutions
- Prepare the student for employment in a broad occupational cluster or industry sector
- Typically include at least four years of high school and one or two years of postsecondary education
- Provide the students, to the extent practicable, with strong experience in and understanding of all aspects of the industry
- Result in the award of a high school diploma or its equivalent, a certificate or diploma recognizing successful completion of one or two years of postsecondary education and/or a skill certificate, and
- May lead to further education and training such as entry into a registered apprenticeship program or admission to a two- or four-year college or university

**Postsecondary Programs**
A postsecondary program is defined as any education and/or training program that is offered beyond high school. This would include coursework offered at the two- and four-year college level (which includes technical college, community college, and university programs). Possibly, it would include certain training courses beyond high school graduation if college credit was awarded.

**Registered Apprenticeship Programs**
Registered Apprenticeship is a rigorous “earn while you learn” model that provides a combination of on-the-job learning and related classroom instruction in which workers learn the practical and theoretical aspects of a highly skilled occupation.

**Industry-Based Certifications (IBCs)**
An industry-based certification is tangible evidence that an individual has successfully demonstrated skill competencies in a specific set of work related tasks, a single occupational area, or a cluster/sector of related occupational areas.
The National Career Readiness Certificate (NCRC) can be earned in addition to a traditional educational diploma. The NCRC is the dominant foundational skills credential in the nation, and Louisiana is working to achieve statewide alignment for workforce, education, government, business and industry, and job seekers. The NCRC signifies that an individual has the essential employability skills needed to succeed in the workplace.

To earn an NCRC, an individual must take three WorkKeys assessments (Applied Math, Reading for Information, and Locating Information) provided through ACT. Examinees can complete this assessment using a paper/pencil version or use a Web-based version. There are four qualification levels used to determine certificate-level eligibility: Platinum (a score of at least 6), Gold (a score of at least 5), Silver (a score of at least 4), and Bronze (a score of at least 3). Scoring the same level in each assessment determines certificate level; however, if different scores are earned in each assessment, the lowest score earned determines certificate level.

For individuals who want to increase their certificate level, KeyTrain® has developed a comprehensive career training course called Career Ready 101®. This is a remediation system that helps improve WorkKeys scores enabling the opportunity to earn a higher credential. Studies have shown that a higher credential means higher wages.

ACT has developed a new system called RegiSTAR™, which is the driving force behind a more seamless production of the NCRC. Examinees register in the system, which generates an ID number allowing for quicker production of the NCRC and automatic registration in ACT's nationwide database.

Louisiana's overall goal is to cut in half, over the next five years, the number of people with an educational barrier preventing them from succeeding in a middle income job.

Note: For more information on WorkKeys, the National Career Readiness Certificate, and RegiSTAR, visit the following ACT Web sites: www.act.org/workkeys and www.myworkkeys.com.
Our world is becoming increasingly smaller and our economy more global. These changes create an ever-widening range of careers. In working through your career exploration process, you may want to develop skills and gain experiences that will increase your knowledge of occupations and widen your career options. Part of that widening process is being sure that you don’t set artificial barriers for yourself regarding your own career choices. Employment in many sectors of our economy has been traditionally segregated by gender, an artificial barrier that many are working to eliminate. Old stereotypes about what careers are for men and what careers are for women do not apply anymore. We cannot afford to lose half the potential workforce in any career field due to outdated notions.

**Explore Before You Choose**

The 16 Career Clusters provide a framework you can use to explore all aspects of a particular career field. Within each cluster, there are multiple pathways, and within each pathway, there are a variety of occupations. Some of these occupations are considered “nontraditional,” which means that less than 25% of one gender is employed in that field.

Your career choices should be made based on your interests and skills. The Career Clusters framework provides you with the opportunity to explore a wide range of career options regardless of your particular background. As you consider career options, do not allow yourself to be steered away from a cluster or pathway because of your lack of experience. As you go through the career exploration process, you may take a career interest inventory like the one that begins on page 4 to help you focus your career choices. But be aware that many of these assessments are based on your experience with typical activities within careers. It is very important that you take the opportunity to explore career choices and build your portfolio of experiences before you start to narrow your options.

**Follow Your Dreams**

As you explore the multiple career options within each Career Cluster, listen to your instincts about what careers will utilize your interests and skills, regardless of who is typically employed in that field. There may be times when you might be discouraged from following your dreams because your career choice does not fit in with traditional gender roles. In the long run, your choice of a career that fits you will provide you with a more satisfying and fulfilling future. And the good news is that research shows that men and women are increasingly moving into, and succeeding in, nontraditional careers. Regardless of the career you chose, do not let anyone’s prejudices, including your own, limit you!

**Consider a Nontraditional Career**

The biggest argument in favor of working in a nontraditional career is the intrinsic benefit of following your dreams and the satisfaction that comes from a job well done. As a “groundbreaker,” you will help overcome gender stereotypes and open the door to others. There is nothing more satisfying than knowing you have made a long-lasting impact on society in addition to doing what you enjoy. For women, participating in a nontraditional career can carry with it significant financial rewards. Male-dominated occupations tend to have higher wages and benefits. When women
are employed in these areas, it can mean over 25% more annual income. For men, nontraditional career choices can also mean higher wages, especially in the health care fields, as compared to many other career choices.

Choosing to be different always carries with it some challenges. However, as daunting as some of these challenges might appear, the workplace is continuing to become much more diverse. A lack of role models and others who support your nontraditional career choices can be discouraging, so it is important to surround yourself with those who support your choices and to find champions who can mentor and guide you.

In some traditionally male careers, the physical demands of the job can be significant. But with the proper preparation, understanding of physical dynamics, and the use of appropriate tools and technology, these barriers can be limited. Certainly carrying a 30-pound toddler on your hip while doing housework has its physical challenges, too!

Central to the current global challenges we are facing is the growing need for a workforce with skills in science, technology, engineering, and mathematics (STEM). A majority of these career fields are nontraditional for women, and in recent years there has been a decline in women’s participation in some of the engineering- and math-related career areas, a loss of human potential we cannot afford. As we have seen the performance gap shrink between boys and girls on standardized assessments in math and science, we have not seen the translation of that success to college preparation and career selection. The opportunities for women in STEM careers are endless.

Most of us carry around the image of an engineer as a white male with wild hair, thick black-rimmed glasses, pocket protector, and white dress shirt and tie, who sits in front of a computer all day running endless mathematical equations. But this image is far from reality. Engineers can be any individuals who are willing use their imagination and analytical skills to invent, design, and build things that matter. They are team players with independent minds who ask, “How can we develop a better recycling system to protect the environment, design a school that can withstand an earthquake, or create cutting-edge special effects for the movies?” By dreaming up creative and practical solutions, engineers are changing the world all the time.

Don’t let your preconceived notions of what career is a fit for you limit your choices. Take the opportunities provided to you by exploring all of the 16 Career Clusters to expand the options you want to choose from. Who knows, maybe you might even choose a nontraditional career!

*National career pathways
Mike Strain, DVM, as Commissioner of the Louisiana Department of Agriculture & Forestry, oversees a 30 billion dollar portion of the state’s economy. An achievement like this reflects years of education, experience, and service that began in high school. A graduate of Covington High School in Covington, Louisiana, Strain was a member of FFA and earned the State FFA Degree. He did undergraduate and graduate work at Louisiana State University, where he received his Doctor of Veterinary Medicine degree. Later he and his wife, Susan Searcy Strain, DVM, opened Claiborne Hill Veterinary Hospital in Covington, which they still own and operate today.

Years of membership and service followed in professional associations, community organizations, and the legislature. As a legislator, Strain served eight years on the Agriculture, Environmental, Commerce, and Health and Welfare Committees, as Chairman of the Rural Caucus, and on the Rural Taskforce under two governors.

Certainly long-time experience and hard work led to Strain’s position today as Commissioner of Agriculture and Forestry. However, this new position appears even more interesting and challenging.

A typical day includes at least a four-hour drive back and forth to work from the Strains’ home on the second floor of their veterinary hospital, plus the likelihood of extensive travel by plane to meetings with commissioners and secretaries from other states and with the Louisiana Congressional delegation in Washington, D.C. His calendar also includes office and field work that involves meetings with and testimony in front of various state government committees, work on numerous task forces, and multiple meetings across the state with local mayors, state senators, and other political figures on topics that pertain to agriculture, the timber industry, and related issues and projects.

Strain’s career in agriculture is both rewarding and challenging, and his experiences provide helpful insights for students.

“Agriculture is a science and a vocation,” said Strain. “Modern agriculture requires that we not only be good stewards of the land, but we must also be on the cutting edge of technology in order to be profitable.”

Strain added that agriculture is responsible for 16 percent of the U.S. economy and that qualified and trained people are needed for jobs in the agricultural industry that go unfilled on an annual basis. “Students involved with agriculture need a good background in agriculture technology in order to compete in a global market,” he said.

The reward? According to Strain, “A long-term career in agriculture will provide a good quality of life for the individual and his or her family.”
One of the 10 key industries in Louisiana, agriculture is a multibillion-dollar industry, creating jobs and generating income in every region of the state, according to an industry overview by Louisiana Economic Development (LED) at http://www.louisianaeconomicdevelopment.com. That industry includes several important segments that involve the production and processing of animal, fishery, and plant commodities.

One-third of U.S. seafood comes from Louisiana, making the state the top seafood-producing state in the nation. Louisiana is also among the 10 largest producers in the U.S. of cotton, sugarcane, yams, rice, and pecans. And Louisiana’s forests support a large pulp and paper industry, as well as production of pine plywood and lumber for construction, according to the LED overview.

Related businesses, including processing, manufacturing, and transportation of these commodities, contribute to Louisiana agriculture in a major way. For example, according to the LED overview, food processors throughout the state have access to convenient, well-developed air, rail, and interstate systems, and to the state’s ports.

However, traditional agriculture isn’t the only field within Agriculture, Food & Natural Resources. This Career Cluster also supports another key industry – energy. Louisiana is the Number 1 producer of crude oil and the Number 2 producer of natural gas in the U.S., according to LED. And, when it comes to the green energy movement, Louisiana agriculture provides materials to make biofuels such as sugarcane for ethanol and chicken fat for jet fuel.

For more information about Louisiana go to the Louisiana Department of Agriculture & Forestry at http://www.ldaf.louisiana.gov.

*National career pathways
Jennifer Wilkins credits the career and technical education (CTE) classes she took at Central High School in Baton Rouge, Louisiana, as the reason she went into architecture. Today, she is an architect at Bradley-Blewster & Associates in Baton Rouge. However, her path from high school student to professional architect wasn’t quick or easy. In high school, Wilkins took three years of drafting, where she learned basic drafting skills and beginners’ AutoCAD, and she acquired a job in architecture. Her knowledge, the help of her teacher, and her job experience gave her an advantage over other students during her first year of architecture in college. She advises future architects to become very familiar with math, science, and English as well. “Architecture is a competitive field, and any advantage is a commodity,” Wilkins said.

To be an architect, college is a must, and, according to Wilkins, students should enroll in a university with good academic credentials, especially in architecture. Also look at portfolios of graduates, and make sure the university is current in technology, programs, and what’s going on in architecture today, she added.

“When time and school permit, intern in architecture offices to acquire all the experience you can and stick with it,” said Wilkins. “School will be tough, but it will be well worth it on the day you design your first building.”

Long, hard days spent in school are just the beginning. A typical workday for Wilkins starts at 7:00 a.m. and usually ends by 5:00 p.m. “During this time, I work on floor plans using the design program called AutoCAD, talk to clients and contractors about projects and problems, and visit the job sites to measure, take notes, check on progress, and assess problems,” she said.

“Although being an architect may seem stressful at times, I get satisfaction at the completion of a project knowing that I have served the community,” Wilkins said.

Kevin Washington helps to build homes for families in Louisiana’s Ouachita Parish. A Construction Worker Helper for Ouachita Habitat for Humanity, his job offers a wide variety of activities.

Kevin received OSHA training through Louisiana Technical College – Delta Ouachita Campus. He received assistance with tuition and books through the Ouachita Business and Careers Solutions Center. The center also helped Kevin with a summer job through its Summer Youth Program.

“My typical workday is 7:45 a.m. – 3:00 p.m., and I have a combination of outdoors and indoors duties,” said Washington. Those duties include reading the blueprints for the home, getting the tools ready for the worksite, and preparing the area for the day by making sure it is well cleaned and organized. He also helps with the siding, baseboards, and cabinetry at the worksite.

Knowledge, organizational skills, attention to detail, job-related abilities, and personal effort are important qualities for success at Washington’s job. He mentioned several of those qualities:

• You must have good communication skills and a good eye for detail.

• You must be prepared to work. It takes discipline, and you must follow instructions.

• You must remember that there will be challenges on the job, but you must stay focused because this is a learning process.

Based on his experiences, Washington said, “If you have an interest in building homes, you will get excitement out of your work.”
Career Spotlight

John Martin

Welding Program

Worthwhile for 2009 Graduate

John Martin, a 2009 graduate of Central High School in Baton Rouge, decided long ago on a career in welding. To follow this career path, Martin enrolled in Central High’s Welding Program. While in school, he also took a job as a welder’s helper in a local welding shop to become familiar with the craft and to make sure this was the right decision for his future.

While still in high school, Martin enrolled in night and daytime classes offered by Associated Builders & Contractors (ABC), Pelican Chapter, an industrial craft training facility in Baton Rouge. After high school graduation, Martin enrolled in the ABC Summer Day Weld Program. The program is a 12-week, 40-hour-per-week course where students gain certification in pipe welding. “The ABC Summer Day Welding Program was well worth the time and effort,” Martin said.

When he completed the ABC program, Martin was hired by Performance Contractors, Inc., and is currently working at Dow Chemical Company in Plaquemine. A merit shop general industrial contractor, the company provides construction and maintenance services to refinery, chemical, petrochemical, power, fertilizer, and pulp and paper industries. An active sponsor of ABC and a partner with local high school welding programs, the company recruited Martin for the ABC courses. Today, the 19-year-old is a Certified Combination Welder. After a few years working as a welder, he plans to take courses to become a Certified Welding Instructor.

“Each day comes with new challenges and every weld made is different,” said Martin. He added that the biggest challenges come when he has to make a weld in a tight place.

Martin’s advice to others who want to follow his career path is, “Decide what you want to do in life and go for it. Keep in mind where it could take you later on in life.”

Career Spotlight

Mindy Pepitone

Electrical Apprentice

Earns While She Learns

Upon graduating from Ponchatoula High School in 1998, Mindy Pepitone was unsure what her next steps would be. In early 2005, after a few false career starts, Pepitone decided to follow in the footsteps of several male relatives and apply to the Baton Rouge IBEW (International Brotherhood of Electrical Workers) Joint Apprenticeship Training Committee (JATC) for admission into their registered apprenticeship program. Pepitone was accepted and began in August 2005.

The apprentices work a regular 40-hour-per-week job as a paid electrical apprentice, receiving valuable on-the-job training. In addition, each apprentice receives related instruction in the classroom. This is a rigorous five-year, postsecondary educational program, where students “earn while they learn.”

Apprentices are dual-enrolled in the local Louisiana Technical College, where Pepitone earns college credit hours that can be applied toward an associate degree. Additionally, Pepitone receives assistance with tuition, books and tools through the Louisiana Workforce Commission’s Baton Rouge Business & Career Solutions Center. She will not have any college loans to worry about after graduation, because – as is true for most registered apprenticeship programs – there are little to no costs for apprenticeship participation.

“I have had some incredible instructors both on the work site and in the classroom. I am looking forward to being a Journey Wireman. This is a career that I love,” Pepitone said.

*National career pathways*
Express Yourself!

People usually think about entertainment industry jobs when they first hear about Arts, A/V Technology and Communications. However, this Career Cluster offers many other opportunities to express yourself in a variety of communications and technology fields.

In the performing arts, you will find actors, musicians, and dancers, of course. And you will find producers, directors, and choreographers. But there wouldn’t be a show without specialists such as lighting and sound technicians, set designers and builders, camera operators and videographers, installers, engineers, and technicians.

In the business, nonprofit, and political worlds, communicators create advertising, marketing, and public relations messages. Coupled with engaging graphic design, these messages introduce us to new products and services, encourage us to make a purchase, and inspire us to take action.

In the broadcasting, Internet, and print media, you will find news anchors and reporters, animators, graphic designers, webmasters, writers, and producers. You also will find sound and video technicians, printing machine operators, computer specialists, and a variety of related engineers and technicians.

But did you know that the field includes telecommunication technicians; telecommunication equipment, cable, and line repairers/installers; telecommunication computer programmers; and systems analysts? Without them, you wouldn’t see favorite sporting events or “live at the scene” reports.

Also consider careers in the A/V industry itself – careers for the technicians who handle sound, video, and data transmission for hotels, convention centers, theme parks, stadiums and museums, and major events.

Careers like these require intellectual curiosity; great language arts, design, and technical skills; and childhood training if you want to be a performer. Usually, they also require career and technical education, a certificate, and an associate or bachelor’s degree, depending on job requirements.

So if you like to perform, write, express yourself visually, or handle the technology involved in arts and communications fields, this Career Cluster may be for you.
Did You Know?

Digital media and entertainment are two of Louisiana’s 10 key industries, according to the Louisiana Economic Development Web site at http://www.louisianaeconomicdevelopment.com. In an article on the site, Elliott Adams, Digital Media Industry Director, said that “…the state is actively building upon its well-known culture to establish a thriving infrastructure for both traditional and digital arts. Beyond digital media, incentives also support live performance, sound recording, and motion picture productions.”

In addition to the digital and performing arts, there are many other good jobs in Arts, Audio/Video Technology & Communications. Start your search for occupations in this Career Cluster at O*NET™ OnLine.

Go to http://online.onetcenter.org/find/career, and follow these links:

• At the right of the Career Cluster title in the menu, you will find an arrow. Click on it, and you’ll go to a screen where you can choose “Arts, Audio/Video Technology and Communications.” Then click on “Go.”
• On the new screen, you will see a long list of careers in this field. Click on a career you might like, and you will go to a screen that has a lot of information about the career.
• At the bottom of that screen, there’s a “State and National” menu. Find your state, and click on “Go.” On the new screen, you will see national and state wages and trends charts.
• To learn more about needed education and training, check that item in the “Modify Occupation Profile Content” box at the bottom of the page. Then click on “Update.”
• Under the “Education and Training” box on the new page, there’s a link to “colleges, training schools, and instructional programs.” Click on it, and you’ll find links to Louisiana schools with related programs.

*National career pathways
Josline Gosserand Frank's career path is all business. Frank is co-owner of Russell Frank Realty Group in Gretna, Louisiana, where she also serves as office manager for the firm and as a realtor. However, her career began in high school where she focused on business subjects: Typing I and II, bookkeeping and accounting, recordkeeping and all of the core subjects.

Her college concentration was all business as well. She earned a bachelor's degree from Southern University and a master's degree from Northwestern State University, both in Business Education, plus additional education in computer literacy, marketing, cooperative office education, and principalship.

Frank knows that it is not necessary to obtain a college degree in order to become a realtor. However, she said, “I highly recommend continuing your postsecondary education.” She also recommends work experience.

“During my high school and college years, I always had a job,” said Frank. Those jobs included retail, fast food, and summer youth work-related programs, which gave her a well-rounded variety of experiences. Through these experiences, she developed a good work ethic; met people who would be her mentors and internship sponsors; learned how to budget money, which prepared her for family life; and worked as part of a team with different races and age groups.

To succeed as a realtor, Frank says, “You must be a highly organized team player, with excellent verbal and written communication skills, have an eye for detail, be a good listener, and have the necessary persistence to conceive, package, and bring the big deals home.”

She also wants future realtors to know that:
- Being a realtor is not a nine-to-five job. It means setting your own schedule and being your own boss.
- Success requires professionalism, diligence, and an ability to work with others.
- Realty is a career for high-energy types who have a way with people.

• Realtors need to know their way around a computer.
• Most realtors work on a commission basis. Their salary depends on their performance, not the company’s staffing budget.

In all, business education, work experience, and hard work have provided Frank with a sense of accomplishment. “Being a realtor can be a very rewarding business in terms of both personal satisfaction and financial success,” she said.

Realty Advice
Josline Gosserand Frank has 25 years of experience both in commercial and residential real estate sales and leasing and in property management and rehabilitation. She also teaches real estate and provides realtors-to-be with some need-to-know information:
- Realtors are licensed and regulated by their respective states. The licensing process is intended to protect the public by having the state ensure that realtors are competent and trustworthy.
- Most states require that a state-administered test be taken and passed. The tests generally cover the rules and regulations governing real estate transactions within the state.
- Upon passing the test and paying the required fee, the person is awarded a license to sell real estate. The license generally has to be renewed at periodic intervals. This usually involves simply paying a fee and filing a renewal application. Many states require that the renewal also show evidence of continuing professional education and will also deny a license renewal if there is evidence of the applicant having engaged in unethical practices.

“Becoming a realtor is not that difficult or complicated,” said Frank. “And it remains a profession that is open to anyone, with or without a college education, who is willing to take the time to learn what is needed to pass the test and work hard to build their business,” she added.
**Did You Know?**

Louisiana Economic Development provides a host of opportunities for relocating and growing a business in the state. If you go to the agency’s Web site at [http://www.louisianaeconomicdevelopment.com](http://www.louisianaeconomicdevelopment.com), you will find pages of information.

On the “Incentive Finder” page, for example, you can learn about Louisiana FastStart™, the Digital Media Incentive, the Economic Development Award Program, Motion Picture Industry Development Tax Credit, a Quality Jobs rebate, and more.

On the “Key Industries” page, you will find a list of business investment opportunities available in Louisiana’s industries – industries that include the strong traditional ones, such as petrochemicals and shipbuilding, and newer growth industries with foundations in technology and research.

Also go to the “Louisiana Business Success Stories.” You will see that Louisiana has many in-demand jobs on the horizon if you are looking for a career in the Business Management and Administration Career Cluster. Some of those include jobs like these:

- General and operations managers
- Accountants and auditors
- Administrative support workers
- Executive secretaries and administrative assistants
- Bookkeeping, accounting and auditing clerks
- Receptionists and information clerks

In fact, on the next two pages, you will find many more in-demand jobs in Louisiana for people who are interested in business careers.

For more information about business careers, go to Career Guide to Industries ([http://www.bls.gov/oco/cg](http://www.bls.gov/oco/cg)), and access the variety of industries in the index at the left. To find postsecondary schools that offer related courses, go to CareerOneStop ([http://www.careerinfonet.org/edutraining](http://www.careerinfonet.org/edutraining)).

Teacher Achieves Childhood Dream

Ashley Pellegrin always knew she wanted to be a teacher, but first she chose to explore the pathway in a high school class for students who wanted to be teachers. “I thoroughly enjoyed this opportunity because it confirmed my decision to pursue my degree in education,” Pellegrin said.

After graduation, Pellegrin earned her bachelor’s degree in elementary education at Louisiana State University in Shreveport. Today, she teaches at Herndon Magnet School in the Caddo Parish School District. “I am so lucky to teach the best subject of all – reading,” said Pellegrin, who also continues to participate in and complete professional development courses that allow her to grow and mature as an educator.

A typical workday for Pellegrin is from 7:20 in the morning to 4 or 5 o’clock in the afternoon – longer than required work hours. “Every second I spend with my students is so valuable. It is my responsibility to teach and prepare them to be successful not only in school, but also in their lives in the ‘real world.’ That is why I not only teach the state’s curriculum,” she said, “but also prepare activities that show the students how they will use reading every day for the rest of their lives.”

According to Pellegrin:
• The day begins with activities such as journal writing, analogies, or problems of the day. “We look through the newspaper, search for numbers in a phone book, and even order from a restaurant menu. Through activities such as these, my students will hopefully develop a desire to be a good reader,” she said.
• After morning activities, the class moves right into reading instruction.
• As the day goes on, lunch and recess come and go so quickly it’s like they never happened, she added.
• Then Pellegrin teaches reading all over again for two other classes of students.
• Finally, at the end of the day, Pellegrin has the class reflect on what they have learned and then pack up to head home.

Sometimes, however, the days are not very typical. “No matter how well you planned your day, something will happen to change its course,” Pellegrin said. She cited a fire drill, an assembly, a sick child, a parent phone call, lost lunch money, school pictures, and more. “Just be ready to be flexible!”

Challenges included, every day on the job also provides immense satisfaction for Pellegrin. “I am greeted first thing in the morning with 20 second grade students who are very excited to see me and always bring a smile to my face. And each day I go home, I know that I have impacted the life of a child in some way. I have helped children learn to do something that will change their life forever. It is the most rewarding job I think anyone can have.”
Did You Know?

Educational Services is the second largest U.S. industry. It accounted for about 13.5 million jobs in 2008, according to the Career Guide to Industries. Across the nation, the job growth rate for this industry is expected to be 12 percent over the next decade.

Why are jobs in education growing? Greater numbers of children and adults are enrolling in all types of schools. And a large number of retirements will provide additional job openings.

In Louisiana, the news about job growth in the Educational Services industry is even better than the national data. In Louisiana, the field is experiencing a faster-than-average growth rate of nearly 17 percent.

As you will see on page 42 of this publication, there are good job prospects for elementary school teachers and for many more educators at every level. But not all jobs in education require four or more years of college. Postsecondary vocational education can lead to jobs as library technicians and preschool teachers.

There are other jobs in Educational Services as well. The Career Guide mentions jobs for teacher assistants, secretaries, administrative assistants, and general office clerks.

For more information about careers in education, go to Career Guide to Industries (http://www.bls.gov/oco/cg/cgs034.htm). To find postsecondary schools that offer related courses, go to CareerOneStop (http://www.careerinfonet.org/edutraining).

BECOMING A TEACHER

The traditional route to becoming a public school teacher involves several steps. Typically those include:

- Completing a bachelor’s degree from a teacher education program
- Obtaining a license
- Proficiency in the use of computers and other technologies
- A student-teaching internship
- Passing a basic skills competency test
- Proficiency in a subject area
- Continuing education and demonstrated satisfactory performance for license renewal
- A minimum grade point average in some states
- A master’s degree in some states

For those who have a college degree in other fields, most states now offer alternative routes to licensure. And preschool and vocational education teachers often need experience in their field rather than a specific degree. For more information, see the Occupational Outlook Handbook at http://www.bls.gov/oco/ocos069.htm.

*National career pathways*
Alerise Linette Guillory has important career advice to share: “Ninety-five percent of my job is performed on a computer using various software programs including Microsoft Office and our core system that tracks our members’ accounts and loan balances and the credit union’s financials,” explained Guillory. “Teamwork, a strong code of ethics, attention to detail, and organizational skills are required for me to perform my job duties each day.”

Guillory described the path she took to gain a top financial job. “My job required me to have a bachelor’s degree in business administration, accounting, or finance. I earned my bachelor’s degree in business administration from Louisiana State University – Alexandria with assistance from the Rapides Business and Career Solutions Center. They assisted with my tuition, books, and fees.” Before earning her degree, she was a bookkeeper for 12 years.

To continue her education, Guillory travels across the country to six to eight conferences a year for specific credit union training. Otherwise, she typically works from 8:00 a.m. - 4:00 p.m. Monday through Thursday and 8:00 a.m. - 5:30 p.m. on Fridays. On any given day in the office, she will:

- Prepare financial statements
- Compile budget data for analysis for the next year’s budget
- Read government regulation to ensure compliance
- Read and help rewrite company policies and procedures to reflect changes in government laws and regulations
- Participate in management and executive meetings to work with other management members to keep the credit union running efficiently
- Attend the monthly board meeting
- Manage the daily activities of three employees

Guillory’s parting words of advice include:

- Gain all the education and knowledge available to you; you never know when it will come in handy.
- Work hard and you will be rewarded for your efforts.
- Make contacts from everywhere you can; they usually prove to be helpful in the future.
- Be flexible and willing to adjust so that you can succeed in any type of environment since economic conditions can become unstable at any given moment.
- In other words, become an asset – the one person the company could not do without, no matter what!
Across the nation, many jobs can be found in the Finance Career Cluster in areas that include banking, insurance, and securities and investments.

In the banking industry, office and administrative support workers hold nearly two out of three jobs. Tellers hold the largest number of positions in this group, according to the Career Guide to Industries, and many job opportunities are expected to open up because of high turnover. A high school diploma is usually the minimum education required for most office and administrative occupations. But banks also look for people in these roles who have good basic math and communication skills, enjoy public contact, and feel comfortable handling large amounts of money.

Management positions in banking often are filled by promoting experienced, technically skilled professionals who achieve various levels of certification. Typically, management, business, and financial positions also require a bachelor’s and sometimes a master’s degree. Good communication and customer service skills are necessary for these and all other occupations in the banking industry.

Similar kinds of education and skills are needed in the insurance industry. According to the Career Guide, numerous job openings will arise from the need to replace workers who leave or retire. And job growth will be found in the medical services and health insurance fields.

In the financial services sector, which involves securities, commodities, and other investments, about two out of three workers have at least a bachelor’s degree. According to the Career Guide, employment is expected to grow along with a growing need for investment services and investment advice. However, if you want to be a sales agent or investment banker, you will find keen competition for these high-dollar positions.

For more information, go to the Career Guide to Industries at http://www.bls.gov/oco/cg, and click on “Financial Activities.”

Government Jobs Can Be Found Close to Home

With more than 1.8 million civilian employees, the federal government, excluding the Postal Service, is the nation’s largest employer, according to the Career Guide to Industries at http://www.bls.gov/oco/cg. About 9 out of 10 federal employees work outside Washington, D.C., and some of those jobs can be found in Louisiana.

However, there is an even more important statistic for citizens of every state. According to the guide, a publication of the Bureau of Labor Statistics, state and local governments employ about 8 million workers, placing them among the largest employers in the economy. Seven out of 10 of these employees work for local governments, such as counties and parishes, cities, special districts, and towns. So you might want to start your search for a government job close to home.

If you want a state-level job, consider the story of Mike Strain, DVM, whose career spotlight appears on page 16. As Commissioner of the Louisiana Department of Agriculture & Forestry, Strain oversees 30 billion dollars of the state’s economy as well as the department’s many responsibilities. But one person can’t do all of that without help.

State employees from many occupational fields support the efforts of more than 100 Louisiana state government agencies. To explore what they do, go to the state Web site at http://www.louisiana.gov. There you will find several helpful links at the left:

- Under “Agencies,” you can access a set of links that lead to an agency index, branches, departments, boards and commissions, and other organizations and contacts.
- Click on the organization chart, and you will find the Louisiana State Government Executive Branch and all of its related units. There’s also a link to each agency on the chart.
- Go to the “Local Governments” link at http://www.louisiana.gov/Government/Local. You will find links to information about parish governments and to a Municipal Directory.

Whatever government Web sites you review – national, state, or local – you may very well link to a government job close to home in Louisiana.
Government jobs aren't just for politicians. Millions more professionals do the work of government. In fact, about 2 million people, in careers that span every career cluster, are federal government employees, according to the Bureau of Labor Statistics (http://www.bls.gov/oco/cgs041.htm). Many of the following federal jobs are available in your state and locality as well:

Accountants, auditors
Aircraft mechanics, service technicians
Biological scientists
Business operations specialists
Compliance officers
Computer specialists
Conservation scientists, foresters
Construction, extraction occupations
Correctional officers, jailers
Detectives, criminal investigators
Drafters, engineering and mapping technicians
Electrical and electronic equipment mechanics, installers and repairers
Engineers and engineering managers
Environmental scientists and geoscientists
Forest and conservation technicians
Inspectors, testers, sorters, samplers, weighers
Installation, maintenance and repair occupations
Judges, magistrates, lawyers, law clerks and other judicial workers
Licensed practical and licensed vocational nurses
Management analysts
Management, business and financial occupations
Natural sciences managers
Nursing aides, orderlies, attendants
Office and administrative support occupations
Physicians and surgeons
Police and sheriff's patrol officers
Production occupations
Professional and related occupations
Purchasing agents
Registered nurses
Secretaries
Service occupations
Tax examiners, collectors and revenue agents
Transportation and material moving occupations

LOOKING FOR A GOVERNMENT JOB?

Many federal, state, parish, and local government agencies have Web sites that list job opportunities. Search the following sites for government jobs in Louisiana and for jobs and student internships at the federal level:

• Louisiana Department of State Civil Service:
  http://www.civilservice.la.gov/jobseekers.asp
• Federal Government “e-Scholar” Programs:
  http://www.studentjobs.gov/e-scholar.asp
• Federal Government Student Jobs: http://www.studentjobs.gov
• USA Jobs: http://www.usajobs.opm.gov

Remember that most federal jobs are located in communities across the nation, so it's a wise idea to search the USA Jobs site.

*National career pathways*
Kelly Koning began her career as an emergency medical technician during her freshman year at Lafayette High School. At the age of 14, she was introduced to the Academy of Health Careers and the Explorer Post 108 program. According to Koning, these programs give young individuals the opportunity to experience life in the medical field. Koning completed the medical courses available through the Academy. In her senior year, she enrolled in an EMT-Basic class and became a medic right out of high school. “Thankfully, I grasped this chance and ran with it,” Koning said.

Preparing for this type of job is not an easy task. To become an EMT-Basic, you must have a GED or high school diploma, complete the EMT-Basic course, pass a national registry written exam, and successfully complete 10 different medical skills at the national registry level, she explained.

As an EMT-Basic, Koning enjoys making a difference in someone’s life. “The fact that I can make an individual’s worst day a little better pushes me to do the best that I can every minute of my job,” she said.

Koning has an inspiring example. “The best thing that I have experienced as a medic was when an adorable two-year-old female approached me at the hospital with a thank-you card and a kiss on the cheek for saving her father’s life. This very emotional moment has taken hold of my heart and never let go since.”

That’s just one example of a very busy, very fulfilling career life for Koning. “My job starts at 4 o’clock in the afternoon and ends at 4 o’clock in the morning. During these 12 hours, it is hard to say what will become of my night.” She provides a few on-the-job experiences:

- From sitting at the station waiting on a call to walking through the pouring rain and bottomless mud to reach a patient, my work environment changes with each call I respond to.
- During my 12-hour shift, I am responsible for the medical care of many individuals. My responsibilities begin with providing care for those in a life-threatening situation and end with taking elderly patients back home to be among family members.
- The job comes with many challenges. As a medic, you have to learn to place your personal life aside when dealing with the emotions of others. You have to be open with people’s many differences in religion, nationality, and morality. To help overcome these challenges, I coach myself not to judge or discriminate against any individual who is slightly different than I am.

“I truly owe much of my success to my family and teachers in the Academy of Health Careers, urging me to strive for the best and nothing but. Not only was I given the knowledge to perform well in the medical field but also advanced in many different personality traits and career-driven skills that aided in my triumph,” said Koning.

“My advice to current and future students would be to give 110 percent in accomplishing every dream or goal that they may have and to never give up. With determination and willingness you can achieve anything possible. So, believe in yourself, and others will follow.”
Career Spotlight

Denise Chriss-Batiste

Registered Nurse Pursues a Bachelor’s Degree

Denise Chriss-Batiste began her nursing career as a licensed practical nurse. But neither her education nor her career stopped with her LPN degree. To advance, she decided to become a registered nurse and enrolled in a two-year associate degree program at Our Lady of the Lake College of Allied Health. She obtained financial assistance from the Baton Rouge Business and Career Solutions Center, which paid for skills training.

Chriss-Batiste’s skills training and her LPN experience served her well as she pursued higher education. “Being an LPN for 10 years prepared me for succeeding in the registered nursing program,” she said. “With the LPN work experience, I was given credit for the clinical skills that I already had, and it knocked off a semester of RN training.” Chriss-Batiste described the prerequisites that she had to take before getting into the program. “For me, I had to have chemistry, anatomy and physiology, microbiology, and labs, as well as classes in English, algebra, philosophy, religion, and history. I had to take all of this before getting into nursing.”

Today, Chriss-Batiste works at Baton Rouge General Medical Center and describes a typical day on the job:

- I work with a maximum of six patients and a team of workers. The team includes doctors, nurses, and others.
- I provide patient education and carry out certain procedures given by the patient’s doctor(s). Procedures may be breathing treatments, for example. Some procedures aren’t so pleasant. I also provide comfort to patients.
- I see patients as young as teenagers up to elderly patients.
- I work 12-hour shifts that begin at 7:00 p.m. and end at 7 a.m. The days vary during the week for me because I’m attending school to pursue my bachelor’s degree in nursing.

Her advice to students is, “Don’t give up! Persistence definitely pays off. I’m a 38-year old student. Obstacles will come, but they are to be triumphed over. Take advantage of all of the opportunities given to you to gain your educational goals.”

Career Spotlight

Lee Studer

Single Father Becomes LPN

A single father raising two children, Lee Studer was able to pursue a career as a licensed practical nurse with help from the Lafourche Business and Career Solutions Center. The center also provided child care assistance and paid for books, uniforms, and supplies for LPN classes and the NCLEX licensure examination.

Before pursuing his LPN degree, Studer trained and worked as a certified nurse assistant for five years, handling emergencies among his other duties. After finishing LPN school, he did research on the place he was going to work and knew what was expected of him. Today, he works at the Cardiovascular Institute of the South in Thibodaux.

“I take all patient vital signs, assist doctors with patient exams, call patients with all lab work results, and help schedule appointments for different procedures,” he said. “I also call pharmacy with prescriptions for patient medicines, help with insurance companies to get bills paid, and help with emergencies that come up in the office.”

Studer has valuable advice for students based on his experience: “Research the job you want to have, what schooling you need to get the job, what they do at the job, and what is going to be expected of you. And get all the schooling you can.”
At the Louisiana Business and Career Solutions Center in Calcasieu Parish, Natasha Johnson heard about a National Emergency Grant that assisted individuals who were living or working in the parish. After working at a variety of occupations, including a job as a personal care attendant at Calcasieu Association for Retarded Citizens, she decided to return to school to obtain her associate degree and become a licensed practical nurse.

A needs assessment indicated that Johnson qualified for assistance with tuition as well as a stipend for meals, travel, books, and supplies, such as clinical uniforms and tools, while in school. Johnson enrolled in the practical nursing curriculum at SOWELA Technical Community College, completed her training on May 19, 2009, and began working for Resthaven Nursing Rehabilitation Center the very next day. The Calcasieu Business and Career Solutions Center also assisted with fees, including the NCLEX license examination fee, and with new uniforms for her new job.

“While I was working at CARC, I received CPR certification which has helped me with my current career as a practical nurse. It also helped in that I was comfortable with dealing with elderly patients,” said Johnson. “To be successful at this job, you must be able to work as a part of a team, multitask, be fast paced in your work, and, most importantly, you must have patience. Every day is a new learning experience,” she added.

Johnson’s days at work vary from week to week, and her hours vary as well, anywhere from 6:30 a.m. to somewhere between 3:00 p.m. and 5:00 p.m. Her duties vary, too. “First, I get a report from the night nurse on how current patients are doing, pass morning medications, complete daily paperwork, pass noon medications, go over doctor’s orders, and assess patients,” she explained.

“The biggest challenge I have is talking with families and doctors. The aspect that I enjoy the most is working and learning with the other nurses and gaining new hands-on knowledge every day,” she added.

If you are a student looking for a future career, Johnson says, “Research before you make a career decision. Nursing needs a lot of dedication that you may not realize until you are actually on the floor caring for patients. Remember, every day presents a different challenge for you to face.”
As one of the largest industries in 2008, health care provided 14.3 million jobs for wage and salary workers nationally, according to the Career Guide to Industries. And if you are interested in health care, you will want to know that 10 of the 20 fastest-growing jobs are in health care. Also the industry will generate 3.2 million new jobs between 2008 and 2018, more than in any other U.S. industry.

The situation is similar in Louisiana, according to the Louisiana Health Careers Web site. Click around and you will learn that:

• Health care is one of the largest industries in Louisiana with an estimated 11,336 job vacancies, and opportunities are growing faster than ever.
• Health careers pay well and offer job security. Health care professionals can work anywhere, and there are consistently more available jobs than trained professionals to fill them.
• Preparing for a health career doesn’t necessarily take long years of study. Many jobs offer on-the-job training and some require only one to two years of school.

You will also find another good reason to visit the site, which is a cooperative effort of The Governor’s Office of the Workforce Commission and the four Louisiana Area Health Education Centers (AHECs). On the home page you can access education and training programs across the state.

Career Spotlight
Darrell D. Teats

Lifelong Learning Leads to Caterer’s Success

Lifelong experience and education built the foundation for a successful catering business for Darrell D. Teats. Describing the services of his business, D. Teats Catering, he said the company caters for any types of functions such as birthdays, anniversaries, rehearsals, weddings, etc., and provides a variety of menus that include both indoor and outdoor cooking.

Teats brings a variety of educational experiences to his work. “My training was done early in life, basically watching my mother cook. From this point, I have been in the restaurant industry since I was 17 years old,” Teats said. Teats also attended Winnsboro High School, the University of Louisiana at Monroe (ULM), and took continuing education classes at Louisiana Tech. “I’ve also worked closely with several professional chefs,” he added.

Like any business owner, Teats faces challenges that include:

- Preparing meals for a very small or a very large number of people: “I handle this challenge by providing potential customers with a variety of menus and/or services that will accommodate their needs,” said Teats.
- Budgeting and planning: As a caterer, he explained, you must be creative and knowledgeable about which foods complement each other, have some knowledge of math in order to do a budget based on different food prices, and be able to plan your meal for the group or function.
- Working with others: “You have to have a friendly temperament to handle potential situations. You also have to be willing to work as a team even though you may be a one-man team,” he added.

Based on his experience, Teats can provide important insights for students. “I encouraged my daughter, Bianca Teats, to take career education classes. Of course, she did. She was an active member and officer in the FBLA (Future Business Leaders of America) organization at her high school in Winnsboro,” he said.

And, for future caterers, he said, “Have a love for cooking and people because these two go hand-in-hand. You must be willing to sacrifice your time in order to prepare for different events and willing to share knowledge about certain dishes/menus. Reading, as well as math, communication, and human relations skills, are very important in the catering business.”

Catering is a business that continues to provide Teats with personal satisfaction. “The thing that I enjoy the most is being able to see the smile on people’s faces once they enjoy the meal and the satisfaction of a job well done.”

Darrell D. Teats, Caterer
Did You Know?

Whether traveling for business or pleasure, the first services that visitors think about are lodging and food. Across the nation, those two services alone create millions of jobs for entry-level workers and for highly skilled specialists and managers. They also create thousands of jobs in Louisiana.

The Hospitality & Tourism Career Cluster prepares students to work in the interdependent lodging, food service, tourism, and recreation-related industries. Sample workplaces include:

- Theme parks
- Tour operations
- Cultural and natural attractions
- Events and festivals
- Sports and entertainment venues
- Convention and meeting services
- Historic preservation districts
- Hotels and other accommodations and
- Food and beverage services

One of the largest career fields in most of these industry subsectors relates to food. That’s why jobs for chefs, head cooks, and restaurant cooks are growing from 5 to 21 percent nationally.

Technology influences food and lodging services as well, so technology skills are a plus. Both food and lodging services rely on technology to enhance efficiency and productivity. And larger hotels rely on computer specialists and information technology and audiovisual technicians to service Web sites and computer and communications networks.

If you are interested in moving up the career ladder to a management job, Career and Technical Education and postsecondary certificates and degrees pay off. For more information, go to the Career Guide to Industries at http://www.bls.gov/oco/cg/cg1009.htm.

And be sure to check out the Louisiana Department of Culture, Recreation & Tourism Web site at http://www.crt.state.la.us. Also see http://louisianatravel.com and http://louisianatravel.com/festivals. You’ll discover a wide variety of cluster-related career opportunities right at home in Louisiana.

*National career pathways*
LaShondra Johnson is a Child Welfare Specialist Trainee in the Office of Community Services (OCS) in Alexandria. And, in her own words, Johnson said, “A typical day on the job at OCS is adventurous. No two days are the same.”

Those days include work in the field visiting clients and in the office completing paperwork. “My hours are 8:30 a.m. - 5:00 p.m., but I often work a lot of overtime,” Johnson said.

“My challenges are working with highly resistant clients,” she added.

To achieve at her career, Johnson earned a bachelor’s degree in social work with the help of the Rapides Business and Career Solutions Center, which paid for her to attend Northwestern State University. Before joining OCS, she received three weeks of intense training by her employer.

According to Johnson, “General communications, human behavior understanding, and a passion for the helping profession” are assets for social workers. She also advised students to “Please be sure of the field you choose to start your career in because there has to be a passion for a successful career, not just the paycheck.”

Quiana Jones is a school social worker at South Lafourche High School working with the Dropout Prevention and Recovery Program. Describing her job, Jones said, “A typical day for me starts with viewing students’ attendance records, and meeting individually with students who have excessive absences. The student and I discuss their reasons for lack of attendance and then we contact parents/guardians of the students to inform them of the school board’s attendance policy.”

Where participation in the program may be harder to obtain, Jones visits students’ homes in another effort to demonstrate the importance of obtaining an education. “Some of the challenges that prospective applicants working a job such as mine may face is understanding that every community is unique and has its own set of issues that may affect the progress and/or regression of an individual or family,” Jones explained. But the challenges are what she enjoys most about her job – “being able to interact with the students, working together with them and their families to help them realize their potentials are without bounds.”

Jones received a Bachelor of Science degree in Family and Consumer Sciences from Nicholls State University. She received assistance through the Lafourche Business and Career Solutions Center, which paid for tuition, books, supplies, and child care while Jones was enrolled in the CRT program while at Nicholls. She then earned a master’s degree in social work from Tulane University.

Her advice to other students wanting to continue their education? “Remember your possibilities are up to you and not others. It’s your truth!”
Sometimes people may need assistance finding a job or appropriate child care, learning skills to find employment, locating safe and adequate housing, and getting nutritious food for their family. Human services personnel help meet these and other human and family needs.

Many jobs in this industry are professional positions that require a bachelor’s or master’s degree and a state license, according to the Career Guide to Industries. Professional and related occupations include social workers, counselors, health educators, and social and human service assistants.

About 36 percent of the jobs in the industry are service occupations, which require little education beyond a high school diploma. These workers include personal and home care aides and home health aides. A number of employers provide in-service training for these workers, such as seminars and workshops. Other employers prefer that workers have an associate or a bachelor’s degree in human services or social work.

Home health aides whose employers receive reimbursement from Medicare must pass a competency test. As result, many home health aides receive some training prior to taking the exam. Some states also require aides to be licensed.

*National career pathways
An associate or a bachelor’s degree is needed to achieve at a career in information technology, said Amanda Lopez. And both she and co-worker Ronnie Campbell Jr. are pursuing their IT degrees at Nunez Community College in Chalmette.

“The classes I took were basic networking and an overall Microsoft course. If it seems complicated, it’s really not, once you get to know it,” said Campbell.

Internships and other related job experience also help when it comes to succeeding on the job. With the assistance of the St. Bernard Business and Career Solutions Center, both Lopez and Campbell were employed through the Summer Youth Program.

Working as a desktop support technician, Lopez’s job involved troubleshooting computer issues and helping co-workers with printers and scanners. Campbell’s job involved troubleshooting computers and hooking up phone ports and jacks.

“All the work is unique,” said Campbell. “I fix problems when people need help. I work indoors and outdoors, at a desk and on the road.”

For career-seekers, Lopez said, “Study and read more into what you strive to do. Never give up, and always keep trying.”
Did You Know?

If you are interested in a career in information technology and computing, you are likely to find an employer who’s interested in you. The computer systems design and services industry is expected to experience rapid growth, adding about 656,400 jobs between 2008 and 2018, according to the Career Guide to Industries.

And professional and related workers will enjoy the best job prospects, reflecting continuing demand for higher-level skills needed to keep up with changes in technology. Among those workers are computer network, systems and database administrators. Jobs in this field are expected to grow from 13-53 percent between 2008-2018.

There are many paths of entry to these occupations. However, employers prefer to hire applicants with some formal college education such as an associate or a bachelor’s degree. For some jobs, employers may substitute relevant computer experience and certifications for formal education.

EXPLORE INFORMATION TECHNOLOGY

To find Louisiana postsecondary schools that offer courses related to information technology, go to CareerOneStop at http://www.careeronet.org/edutraining.

*National career pathways
A firefighter for the St. Bernard Parish Fire Department in Chalmette, Rebecca Stechmann described what it’s like on her job.

“A day at work is always different. You never know what will happen. There could be a car fire or house fire and even a cat stuck in a tree that you need to help free. Your job is to help people any way you can.”

The St. Bernard Business and Career Solutions Center provided for Stechmann’s on-the-job training. She attended LSU Fire School and passed the examinations for the Fire Fighter I and Fire Fighter II certifications.

She also is certified as a first responder. “It’s a 14-week school with a lot of hard work you need to put into it to make it through,” she said.

For anyone who wants to pursue her career, Stechmann’s advice is “Never give up!”

Law and Public Safety Jobs Require Solid Math Skills

There are thousands of jobs in the Law, Public Safety, Corrections & Security Career Cluster, and students need a solid background in math, science and technical skills to prepare for these careers, according to a brochure published by the States’ Career Clusters Initiative. Education and training can be obtained in high school Career and Technical Education programs, at two- and four-year colleges and at technical schools and institutes. To find and view the brochure, go to http://www.careerclusters.org, click on “Resources,” then “Career Clusters Brochures.”

Under the “Resources” tab, also click on “Career Cluster Models.” There you’ll find a list of many jobs that fall into five different career cluster pathways:

- Correction Services
- Emergency and Fire Management Services
- Security and Protective Services
- Law Enforcement Services
- Legal Services

For more information about jobs that interest you, go to the Occupational Outlook Handbook at http://www.bls.gov/oco.
Did You Know?

Many careers in Law, Public Safety, Corrections & Security contribute to the national Homeland Security initiative. Twenty-four of Louisiana’s community colleges and 18 of its four-year colleges offer courses related to this Career Cluster.

For other careers in Law, Public Safety, Corrections & Security, go to:
- American Bar Association: http://www.abanet.org/home.html
- Federal Bureau of Investigation: https://www.fbijobs.com
- Forensic Sciences Foundation: http://www.forensicsciencesfoundation.org
- Louisiana State Police: http://www.lsp.org; click on “Recruiting”

Appliance Repair a ‘High-Demand Field’

At Mitch Romero’s Appliance & Air Conditioning Repair Service in Maurice, appliance technician Donald Hull works in a shop environment troubleshooting problems and performing repairs on home appliances. Typically, Hull works on refrigerators, freezers, stoves, washers, dryers, and dishwashers.

What does it take to perform this type of work? In Hull’s experience, he found that “You need to be mechanically inclined. You need to know how to properly use hand tools and would need training on specialty tools. And you must be focused and able to concentrate.”

When it comes to learning to be an appliance technician, Hull said, “Most people in this field need some type of training such as a technical college or trade school unless they have transferable skills from a similar occupation.”

Hull received assistance through the Lafayette Business and Career Solutions Center. There he was administered the WorkKeys® job skills assessment and received on-the-job training. Currently Hull is being trained to go into customer’s homes on service calls to troubleshoot and repair in the field.

“This is a very high-demand field that will continue to thrive in the future,” Hull said about his career in particular. And, in regard to career advice in general, “Always keep your eyes and ears open,” he added.

Machinist’s Advice: School, a Good Attitude, and Good Work Ethics

Joshua Arceneaux is a machinist at All Service Machine Shop in Chalmette. According to Arceneaux, “We repair shafts and make parts for airplanes for the military and various other industries. My job is to sand blast metal parts, cut with a torch, drill center holes, and clean up.”

Arceneaux enlisted assistance from St. Bernard Business and Career Solutions Center where he received on-the-job training.

For students and others seeking a career, Arceneaux recommends school, a good attitude, and good work ethics. “Stay in school, get education, and show up at work – if you are early, you are on time; if you are on time, you are late,” he said.
Did You Know?

According to the Louisiana Economic Development, advanced manufacturing and production of nuclear energy-related reactor components are two of Louisiana’s 10 key industries. Major segments of advanced manufacturing in Louisiana are advanced materials, aerospace, aviation, durable goods, and shipbuilding, according to an online industry overview at http://www.louisianaeconomicdevelopment.com.

And because nuclear power production is expected to grow worldwide, Louisiana’s reputation in the field of advanced manufacturing can position the state as a significant provider of reactor components. On the Web site, Louisiana Economic Development’s Advanced Manufacturing Director, Von Hatley, said that “Louisiana is aggressively competing to become a significant participant in the industry, notably in the development of modular components for new reactors.”

For more information about careers in advanced manufacturing, go to O*NET™ OnLine at http://online.onetcenter.org, click on the arrow next to “Career Cluster.” Then follow the menu to the “Manufacturing” link to find dozens of career links. Also see the Occupational Outlook Handbook at http://www.bls.gov/oco.

To locate more information related to advanced manufacturing and energy courses, access the Louisiana Community and Technical College System at http://www.lctcs.edu and the Louisiana Board of Regents at http://regents.state.la.us.

MANUFACTURING CAREER RESEARCH

To find Louisiana postsecondary schools that offer courses related to advanced manufacturing, go to CareerOneStop at http://www.careerinfonet.org/edutraining.

Insurance sales clerk Amanda Wood works for an insurance agency. On top of that, she presently is studying to take an exam for insurance underwriters. The Occupational Outlook Handbook lists three organizations that offer training programs and examinations that lead to various insurance certifications.

Describing the knowledge and experience needed for a career in insurance sales, Wood said, “An individual who is going to sell insurance usually has a bachelor’s degree and at least three years of on-the-job experience. You also need to be good at computations and have excellent math skills.”

Wood received scholarship funds through the St. Bernard Business and Career Solutions Center, which assisted her in earning a bachelor’s degree.

Wood uses those skills daily on job tasks that include researching quotes for life, homeowner, and medical insurance, for example. During her 30- to 35-hour work week, she also handles customers’ policy purchases and transactions.

The most challenging part of Wood’s job is when she has to assist a customer who is going through the grief of a loss, such as a relative’s death. Her greatest joy is working with the public. “It’s a unique and pleasant experience,” she said.

“My best advice is to stay in school. In addition, take the advice of your career counselors in high school or the local career center,” she said. “This will give you some directions that will help you to achieve a rewarding career that you enjoy.”

Out-of-state visitors to Louisiana State Parks spent almost $12 million in the state and produced an economic impact of over $24 million. Louisiana residents spent another $29.2 million while visiting the parks. That fact alone supports the state’s effort to promote Louisiana tourism, and you can find it at http://www.crt.louisiana.gov/tourism. And the site itself represents the kind of work that graphic designers, writers, webmasters, and others contribute to state tourism.

It’s the job of Louisiana Seafood Promotion & Marketing Board staff to develop and direct a wide variety of communications programs to support the industry. Find out about these marketing efforts at http://www.louisianaseafood.com/about_board.cfm.

Some of America’s largest companies are CenturyLink, Entergy, Pool, and Shaw Group, all headquartered in Louisiana. Check their Web sites for links to investor and media relations. You will find that large companies like these, and smaller ones as well, have jobs for trained marketing professionals.

Successful companies large and small pay attention to marketing. Go to the CareerOneStop Web site at http://www.careerinonet.org/edutraining to find postsecondary schools that offer courses related to marketing careers.

*National career pathways*
An “I can do it” attitude has been life changing for Calvin Hickman. In fact, Hickman says, “No matter what happens, do as much as you can to fulfill your goals, and never give up even though it might get hard.”

Hickman’s career journey is a great example of his personal belief. In the past, he had worked as a dishwasher, a cook, and a concrete form laborer. Today, he is an industrial painter at a Shaw Group location in the Lake Charles area, and he is taking night classes to complete his degree in Process Technology at SOWELA Technical Community College.

With assistance from a National Emergency Grant offered by the Calcasieu Parish Business and Career Solutions Center, Hickman enrolled in the Process Technology program at SOWELA. “This is where I gained the ability to read and understand procedures, whether at a chemical plant or modular plant like Shaw. Also, the instruction that I received from SOWELA taught me how to troubleshoot, which is extremely important when working in the field with various tools and techniques,” he said.

“Also, learning how to translate book knowledge and what I learned in the classroom to real-life scenarios took some adjusting. To overcome these challenges, I had to adapt to different personality styles, keep open communication with my supervisors, keep an open mind to learning new procedures, and always keep in mind that there is room for improvement – that I don’t know everything and that my coworkers can be a great tool to learn from,” he added.

The thing that I enjoy the most about my job is the camaraderie between co-workers and the atmosphere and attitude of the work area,” he said.
Did You Know?

Today’s high-growth industries are producing in-demand jobs that require a background in science, technology, engineering and mathematics (STEM). That is particularly true for Louisiana. On its Web site, Louisiana Economic Development lists the state’s 10 key industries – all of which include STEM-related career opportunities:

- Advanced Manufacturing
- Agriculture, Food & Wood Products
- Digital Media
- Energy
- Entertainment
- Headquarters & Shared Services
- Life Science
- Logistics and Transportation
- Nuclear and
- Technology

STEM also is one of 16 career clusters that link what students learn in school with the knowledge and skills they need for success in postsecondary education and careers. According to the States’ Career Clusters Web site, “Career clusters identify pathways from secondary school to two- and four-year colleges, graduate school, and the workplace, so students can learn in school and what they can do in the future.”

So if STEM subjects are among your strengths, work to excel in math, science, and English, which are essential in this high-paced and high-tech 21st century. Enroll in a STEM-related career and technical education program while in high school. And join a career and technical student organization connected with your career interest.

STEM SITES TO EXPLORE

According to Career Voyages, 37 of Louisiana’s community colleges and 21 of the state’s four-year colleges offer courses related to advanced manufacturing. Go to http://www.careervoyages.gov/advmanufacturing-main.cfm. The site also provides videos and much more information about careers in the field.

Explore Green Jobs

Occupations related to the Science, Technology, Engineering & Mathematics Career Cluster are in the forefront of the future job market. For more information, go to http://www.careervoyages.gov/green-main.cfm.

*National career pathways*
Automotive service technicians inspect, maintain, and repair automobiles and light trucks that run on gasoline, electricity, or alternative fuels such as ethanol. The increasing sophistication of these vehicles requires workers who can use computerized shop equipment and work with electronic components while maintaining their skills with traditional hand tools, according to the Occupational Outlook Handbook.

In fact, automotive service technicians and mechanics must continually adapt to changing technology and repair techniques as vehicle components and systems become increasingly sophisticated. Therefore, most employers regard postsecondary education in automotive service technology as the best preparation for trainee positions.

Jeff Steddum’s career is one of many related careers that you will find in the Transportation, Distribution & Logistics career cluster. And his educational pathway is typical of today’s requirements.

Steddum earned an associate degree in motor vehicle technology in addition to participating in a vocational-technical program that included on-the-job training. Today, he is a Group Leader at All Star Chevrolet in Baton Rouge. Work is performed in an indoor shop, hours vary by job demands and workload, but mostly the workday is 8:00 a.m. to 8:00 p.m., Steddum explained. “A typical day includes coordinating with team members to assess vehicle needs and repairs and distributing tasks accordingly,” he added.

“A career can be made out of any job if you are the best at it,” said Steddum, describing what it takes to be successful. “A sense of purpose and motivation are extremely important. Be motivated and take education seriously.”
Creating and manufacturing something customers want to buy is one thing. But getting the product to customers when they want or need it is another important part of the relationship between companies and customers. That part of the company-customer relationship is the responsibility of people who work in the Transportation, Distribution & Logistics career cluster.

As you can tell, this career cluster is critical to the U.S. economy and provides jobs for 10 million people nationally, according to a States’ Career Clusters Initiative brochure at http://www.careerclusters.org. In fact, Logistics & Transportation is a key industry in Louisiana, according to Louisiana Economic Development, an industry that attracts large companies to move to the state. Go to http://www.louisianaeconomicdevelopment.com, click on “Key Industries,” then “Logistics & Transportation.” In brief, here’s what you will find:

• Louisiana offers seven commercial service/primary airports, six major interstate highways, and the world’s largest port complex.
• The Port of South Louisiana is the largest single port in the nation measured by tonnage.
• Louisiana is one of only two sites in the nation where all six of North America’s Class One railroads converge.
• Louisiana has a wealth of warehouse space in close proximity to commercial outlets.

So, it’s a good idea to consider a career in Transportation, Distribution & Logistics. You will discover in-demand jobs, both in Louisiana and nationally, for truck drivers, automotive service technicians, mobile heavy equipment mechanics, managers, laborers, and more.

- Small Engines

Sample Job Profile for National Career Readiness Certificate

Automotive Service Technicians and Mechanics
Automotive service technicians and mechanics diagnose, adjust, repair, or overhaul automotive vehicles. Master mechanics repair virtually any part on the vehicle while the technicians repair only one system or component on a vehicle.

- Knowledge of machines and tools, including their designs, uses, repair, and maintenance
- Knowledge of circuit boards, processors, chips, electronic equipment, and computer hardware and software
- Knowledge of the practical application of engineering science and technology

Required NCRC Certificate Level: Silver

WorkKeys®: For more information, visit www.myworkkeys.com
Create an Individual Graduation Plan

There are many important reasons to graduate from high school and continue your education. Among those reasons are to:

- Explore educational and career possibilities
- Make appropriate secondary/postsecondary decisions as part of an overall career plan
- Make a plan based on your talents and interests
- Consider graduation requirements relevant to your chosen area of concentration and postsecondary entrance requirements.

The 2009 Louisiana legislature considered reasons like these as they worked to pass Act 257 to help students across the state create an Individual Graduation Plan (IGP) by the end of eighth grade.

Your school counselor can provide you with information, advice, and IGP forms to complete. Your family also can advise you and help you complete the forms. And the information on the following pages will help you get started.

That information includes a choice of diplomas and their requirements. The choices are the Career Diploma or one of the two College and Career Diploma curriculum options – the Louisiana Core 4 Curriculum and the Louisiana Basic Core Curriculum. You'll see a list of requirements for a Career Diploma on the next page. Requirements for the two College and Career Diploma options appear on page 114.

Louisiana high school diplomas also come with your choice of a Career/Technical Endorsement or an Academic Endorsement. You can find out more on page 115 and on the Louisiana Department of Education Web site at http://www.doe.state.la.us/lde/saa/1179.html.

And if you reviewed the endorsements, you may have noticed references to TOPS and TOPS Tech. Those abbreviations refer to the Taylor Opportunity Program for Students (TOPS), a merit-based scholarship program Louisiana offers. For more information about TOPS and other financial assistance opportunities, go to the Louisiana Office of Student Financial Assistance at http://www.osfa.la.gov.
Louisiana Graduation Requirements - Career Diploma

_____ English – 4 units
- English I, II
- 2 units from the following: Technical Reading and Writing, Business English, Business Communications, Using Research in Careers (1/2 credit), American Literature (1/2 credit), Film in America (1/2 credit), English III, English IV, Senior Applications in English, or a course developed by the local education agency (LEA) and approved by the Louisiana State Board of Elementary and Secondary Education (BESE)

_____ Math – 4 units
- One of the following: Algebra I (1 unit), or Algebra I-Part 1 and Algebra I-Part 2 (2 units), or Applied Algebra I (1 unit)
- Remaining units from the following: Geometry or Applied Geometry, Technical Math, Medical Math, Applications in Statistics and Probability, Financial Math, Math Essentials, Algebra II, Advanced Math-Pre-Calculus, Discrete Mathematics, or course(s) developed by the LEA and approved by BESE

_____ Science – 3 units
- Biology
  - 1 unit from the following physical science cluster: Physical Science, Integrated Science, Chemistry I, ChemCom, Physics I, or Physics of Technology
  - Remaining units shall come from the following: Food Science, Forensic Science, Allied Health Science, Basic Body Structure and Function, Basic Physics with Applications, Aerospace Science, Earth Science, Agriscience II, Physics of Technology II, Environmental Science, Anatomy and Physiology, Animal Science, Biotechnology in Agriculture, Environmental Studies in Agriculture, Health Science II, EMT–Basic, an additional course from the physical science cluster, or course(s) developed by the LEA and approved by BESE

_____ Social Studies – 3 units
- ½ unit of Civics
- ½ unit of Free Enterprise
- American History
- 1 unit from the following: Child Psychology and Parenthood Education, Law Studies, Psychology, Sociology, World History, World Geography, Western Civilization, Economics, American Government, African American Studies, or a course developed by the LEA and approved by BESE

_____ Health – ½ Unit

_____ Physical Education – 1½ units

_____ Career and Technical Education – 7 units
One of the seven units must be either Education for Careers or Journey to Careers. The remaining six units should include the minimum courses required to complete a Career and Technical Area of Concentration.

_____ Total – 23 units
### Louisiana Core 4 Curriculum

- **English – 4 units**
  - English I, II, III, and IV

- **Math – 4 units**
  - Algebra I or Algebra I-Pt. 1 and Algebra I-Pt. 2
  - Geometry
  - Algebra II

- **Science – 4 units**
  - Biology
  - 1 unit from the following: Physical Science, Integrated Science, Physics I, Physics of Technology I, Aerospace Science, Biology II, Chemistry II, Earth Science, Environmental Science, Physics II, Physics of Technology II, Agriscience II, Anatomy and Physiology, or a locally initiated elective approved by BESE as a science substitute.

- **Social Studies – 4 units**
  - ½ unit of Civics or AP American Government
  - ½ unit of Free Enterprise.
  - American History
  - 1 unit from the following: World History, World Geography, Western Civilization, or AP European History
  - 1 unit from the following: World History, World Geography, Western Civilization, AP European History, Civics (second semester – ½ credit), Law Studies, Psychology, Sociology, or African American Studies.

- **Health – ½ Unit**

- **Physical Education – 1½ units**

- **Foreign Language – 2 units**
  - 2 units from the same foreign language or 2 units of speech

- **Arts – 1 unit**
  - Fine Arts Survey or one unit of Art, Dance, Music, or Theatre.

- **Electives – 3 units**
  - Electives should come from the student’s Area of Concentration to qualify for the Career/Technical Endorsement.

- **Total – 24 units**

### Louisiana Basic Core Curriculum

- **English – 4 units**
  - English I, II, III and IV or Senior Applications in English

- **Math – 4 units**
  - Algebra I or Algebra I-Pt. 1 and Algebra I-Pt. 2
  - Geometry

- **Science – 3 units**
  - Biology
  - 1 unit from the physical science cluster: Physical Science, Integrated Science, Chemistry I, Physics I, or Physics of Technology I
  - 1 unit from the following: Aerospace Science, Biology II, Chemistry II, Earth Science, Environmental Science, Physics II, Physics of Technology II, Agriscience II, Anatomy and Physiology, an additional course from the physical Science cluster, or a locally initiated elective approved by BESE as a science substitute.

- **Social Studies – 4 units**
  - ½ unit of Civics or AP American Government
  - ½ unit of Free Enterprise.
  - American History
  - 1 unit from the following: World History, World Geography, Western Civilization, or AP European History
  - 1 unit from the following: World History, World Geography, Western Civilization, AP European History, Civics (second semester – ½ credit), Law Studies, Psychology, Sociology, or African American Studies.

- **Health – ½ Unit**

- **Physical Education – 1½ units**

- **Foreign Language – 2 units**
  - 2 units from the same foreign language or 2 units of speech

- **Arts – 1 unit**
  - Fine Arts Survey or one unit of Art, Dance, Music, or Theatre.

- **Electives – 3 units**
  - Electives should come from the student’s Area of Concentration to qualify for the Career/Technical Endorsement.

- **Total – 24 units**

* A student completing a Career and Technical Area of Concentration may substitute a BESE/Board of Regents approved IBC-related course from within the student’s Area of Concentration for the fourth required science unit, the fourth required social studies unit, and the required art unit.

** Approved IBC-related course may be substituted.
## Louisiana High School Diploma Endorsements

### Core Courses

#### Current
- **TOPS Opportunity**
  - 4 Units of English
  - 3 Units of Math
  - 3 Units of Science
  - 3 Units of Social Studies
  - 1 Unit of additional Math or Science
  - ½ Unit of Health
  - 1½ Units of PE
  - 1½ Units of electives

#### 2011-2012
- **TOPS TECH**
  - 4 Units of English
  - 3 Units of Math
  - 3 Units of Science
  - 3 Units of Social Studies
  - 1½ Unit of Health
  - 1½ Units of PE
  - Option 1 (4 credits)
  - OR
  - Option 2 (6 credits)

#### Core Courses

- **LA Core 4**
  - 4 Units of English
  - 4 Units of Math
  - 4 Units of Science
  - 1½ Unit of Health
  - 1½ Units of PE
  - 1 Unit of Art
  - 2 Units of Speech or Foreign Language
  - 3 Units of electives including a computer-related course

- **TOPS Opportunity**
  - 4 Units of English
  - 3 Units of Math
  - 3 Units of Science
  - 3 Units of Social Studies
  - 1 additional unit of Math or Science
  - ½ Unit of Health
  - 1½ Units of PE
  - 1 Unit of Fine Arts
  - 2 Units of Foreign Language
  - ½ Unit of a computer-related course
  - 3½ Units of optional electives

- **LA Core 4 +**
  - 4 Units of English
  - 4 Units of Math (Algebra I, Geometry, Algebra II)
  - 1 Unit of Advanced Math I or II, Calculus, Pre-Calculus, Probability & Statistics, or Discrete Math
  - 4 Units of Science (Biology, Chemistry, one advanced science, and one other science)

- **LA Core 4**
  - 4 Units of English
  - 4 Units of Math
  - 4 Units of Science
  - 4 Units of Social Studies
  - ½ Unit of Health
  - 1½ Units of PE
  - 1 Unit of Fine Arts
  - 2 Units of Foreign Language
  - 3 Units of electives

### High School Area of Concentration

- Student must complete four elective credits in an area of concentration and two related elective credits. The areas of concentration shall be developed locally by a district Curriculum Design Team and approved by BESE

### GEE (Graduation Exit Examination)

- Pass all four components with a score of **Basic** or above OR one of the following combinations with the **English Language Arts** score at **Basic** or above:
  1. **Approaching Basic**, 1 **Mastery** or **Advanced, Basic** or above in the remaining two
  2. **Approaching Basic**, 2 **Mastery** or above

### GPA/ACT

- **TOPS Opportunity GPA**
- ACT of 20 (or state average) or Silver Level on WorkKeys

### Other Performance Indicators

- BESE-approved industry-based certification
- OR 3 college hours in a career-technical area that articulate to a post-secondary institution, either by actually obtaining the credits and/or being waived from having to take such hours
- A minimum of 90 work hours of work-based learning experience OR a Senior Project related to a student’s area of concentration with 20 hours of related work-based learning and mentoring

### Academic Endorsement

#### Current
- **TOPS Opportunity**
  - 4 Units of English
  - 3 Units of Math
  - 3 Units of Science
  - 3 Units of Social Studies
  - 1 additional unit of Math or Science
  - ½ Unit of Health
  - 1½ Units of PE
  - 1 Unit of Fine Arts
  - 2 Units of Foreign Language
  - ½ Unit of a computer-related course
  - 3½ Units of optional electives

#### 2011-2012
- **LA Core 4**
  - 4 Units of English
  - 4 Units of Math
  - 4 Units of Science
  - 1½ Unit of Health
  - 1½ Units of PE
  - 1 Unit of Art
  - 2 Units of Speech or Foreign Language
  - 3 Units of electives

### High School Area of Concentration

- Students satisfy this requirement by completing the core courses listed above.

### Other Performance Indicators

- Senior Project **OR**
  - 1 Carnegie unit in an advanced placement (AP) course with a score of 3 or higher on the AP exam
  - 1 Carnegie unit in an international baccalaureate (IB) course with a score of 4 or higher on the exam
  - 3 college hours of nonremedial, articulated credit in a core area (Mathematics, Social Studies, Science, Foreign Language, or English Language Arts)
Career and Technical Student Organizations

All students enrolled in career and technical programs have an opportunity to develop and extend their learning through participation in career and technical student organizations (CTSOs) associated with their program. CTSOs develop character, citizenship, technical, leadership, and teamwork skills essential for students who are preparing for the workforce and further education. These organizations enhance students’ civic awareness and provide opportunities for developing social competencies and a wholesome attitude about living and working.

SkillsUSA is a partnership of high school and college students who are preparing for careers in trade, technical, and skilled service occupations, including health careers. Teachers and industry representatives work together with students to ensure America has a skilled workforce. [www.skillsusa.org](http://www.skillsusa.org)

Distributive Education Clubs of America (DECA) supports the development of marketing and management skills in career areas such as hospitality, finance, sales and service, business administration, and entrepreneurship. DECA provides recognition and leadership activities directly related to attainment of specific occupational and leadership skills. [www.deca.org](http://www.deca.org)

Health Occupations Students of America (HOSA) promotes career opportunities in the health care industry and enhances the delivery of quality health care to all people. HOSA provides a unique program of leadership development, motivation, and recognition exclusively for secondary, postsecondary, adult, and collegiate students enrolled in health science technology education programs. HOSA is 100% health care! [www.hosa.org](http://www.hosa.org)
The **National FFA Organization** uses agricultural education to create real-world success for students. There are more than 7,000 FFA chapters that offer students opportunities for leadership, personal growth, and career growth. FFA programs are managed on local, state, and national levels and represent more than 300 careers in the food, fiber and natural resources industry. [www.ffa.org](http://www.ffa.org)

**Family, Career and Community Leaders of America (FCCLA)** is a national organization for students who participate in family and consumer sciences education. Focusing on multiple roles of family member, wage earner, and community leader, members develop character, creative and critical thinking skills, interpersonal communication, and practical knowledge in addition to preparing for careers. [www.fcclainc.org](http://www.fcclainc.org)

The **Technology Student Association (TSA)** is devoted exclusively to the needs of students interested in technology. TSA’s membership includes more than 150,000 middle and high school students in 2,000 schools spanning 47 states. Members learn through exciting competitive events, leadership opportunities, and much more. [www.tsaweb.org](http://www.tsaweb.org)

A quarter million students prepare for careers in business and business-related fields as members of **Future Business Leaders of America-Phi Beta Lambda**. The high school division has 215,000 members, and the post-secondary division reaches over 11,000 college students. Membership and career recognition programs designed for each division also provide personal and chapter development opportunities. [www.fbla-pbl.org](http://www.fbla-pbl.org)

Glossary

**Ability to Benefit** – Requires that students attending postsecondary institutions receiving Title IV financial aid take a standardized test that demonstrates their ability to benefit from a postsecondary education experience. Students not receiving financial aid may not be held to institutional entrance requirement any less stringent than those receiving aid.

**Admissions Criteria** – Minimum educational requirements that applicants must meet to be considered for admission to a postsecondary educational institution.

**Advanced Placement** – Thirty-seven college-level courses offered by the College Board to interested high schools. At the completion of the course, students with acceptable scores on an examination earn college credit toward a degree, certificate, or other formal award or advanced standing at most of the nation’s colleges and universities.

**Articulated Credit** – Credit earned by a student while in high school that is awarded at the postsecondary level utilizing various methods that include challenge exams, articulation agreements, portfolio assessments, industry-based certifications, etc.

**Articulation** – Articulation is the process by which coursework completed in one educational system is given credit in another.

**Articulation Agreement(s)** – An official agreement in which one educational institution agrees to accept specific courses or groups of courses from another educational institution as a part of the receiving institution’s credentialing programs.

**Banked Credit** – Credits earned (typically by high school students taking college-level courses) that are held “in abeyance” until a student has completed other requirements (e.g., high school graduation) and has become a full-fledged student of the college planning to award the credit.

**Block vs. Course-By-Course Articulation** – The process by which entire groups of courses completed in one institution are awarded as credit by another institution, as contrasted with a one-course-at-a-time, traditional course transfer between institutions.

**Career Pathways/Areas Of Concentration (AOC)** – A coherent and focused sequence of rigorous academic and career/technical courses, commencing in the ninth grade and leading to postsecondary education and/or work. Career pathways/AOC that are implemented and maintained in partnership among secondary and postsecondary education, business, and employers represent the skills and knowledge necessary to pursue a full range of career opportunities within a pathway, from entry level to management, including technical and professional career specialties.

**Career Clusters** – Career clusters are a broad group of career areas that represent a scope of employment that involves grouping occupations from one or more industries that share common skill requirements. Career clusters provide a means
of organizing the thousands of career choices for implementation in the school curriculum.

**Career Options Law** – The Career Options Law is designed to help students create a focus while in high school to help make learning more relevant and meaningful. The law mandates that all sixth through eighth grade students must complete six career awareness activities each year culminating with a five-year educational plan to be reviewed and updated annually while in high school, and all high schools must offer career majors (areas of concentrations) to address students’ interests. (Board of Elementary and Secondary Education [BESE] Policy: Bulletin 741)

**Career Options Program** – A program that mandates measures to ensure Louisiana students are equipped with the skills and knowledge necessary to pursue a satisfying and rewarding career matched to aptitude and interests. The program is evaluated on an annual basis. (BESE Policy: Bulletin 741)

**Certificate of Technical Studies (CTS)** – An applied technical program (21 – 33 hours). CTS programs are formed by combining multiple technical competency areas (TCAs) to provide a student with a broad technical competency. CTS programs are strictly limited to technical and community colleges. The approval authority resides with the Louisiana Community & Technical College System (LCTCS) Board of Supervisors, but the actions must be reported immediately to the Board of Regents (BOR). All other BOR requirements governing academic programs apply to the CTS.

**CLEP Credit** – The College Board’s College-Level Examination Program® or CLEP provides students of any age with the opportunity to demonstrate college-level achievement through a program of exams in undergraduate college courses. Students may earn credit for knowledge learned through independent study and/or advanced high school courses. CLEP examinations cover material taught in courses that most students take as requirements in the first two years of college. A college usually grants the same amount of credit to students earning satisfactory scores on the CLEP examination as it grants to students successfully completing that course.

**Concurrent Enrollment** – Courses taken by students offered by a postsecondary institution outside the regular school hours (e.g., at nights, on weekends, or during summer) for which students will receive credit only at the postsecondary institution. Postsecondary Process Institutional Responsibilities for the Enrollment of Students Across Multiple Institutions: Students simultaneously taking coursework at varied postsecondary institutions without designation of a home institution shall be governed by appropriate policies and procedures of each postsecondary institution offering courses in which they are enrolled. Postsecondary institutions shall work together to synchronize such policies and procedures to the greatest extent possible. It is incumbent upon all postsecondary institutions to eliminate undue barriers which inhibit/prohibit the applicability of credit earned across varied institutions (BOR Academic Affairs Policy 2.19).

**Credit vs. Noncredit** – Credit: Recognition of attendance or performance in an instructional activity (course or program) that can be applied by a recipient toward the requirements for a degree, diploma, certificate, or other formal award. (U.S. Department of Education Institute of Education Sciences [IPEDS] at [http://nces.ed.gov/ipeds/glossary](http://nces.ed.gov/ipeds/glossary).) Credit course: A course that, if successfully completed, can be applied toward the number of courses required for achieving a degree, diploma, certificate, or other formal award. (Kansas State University Office of Planning and Analysis).

**Cross-enrollment** – The simultaneous enrollment of a student in more than one postsecondary institution wherein one institution serves as the student’s home institution. Cross-enrollment enables students registered at a specific postsecondary institution to enroll...
without formal admission to another postsecondary institution. The purpose of cross-registration is to provide opportunities for enriched educational programs by permitting full-time paying undergraduate and graduate students to cross-register for a course. Typically, students should not cross-register for a course that is offered at their postsecondary institution unless there are exceptional circumstances.

Diploma Endorsements – An enhancement to a regular high school diploma that recognizes additional work completed beyond the high school graduation requirements to enhance a student’s junior/senior years and to prepare for and/or provide a credential for postsecondary work.

Dropout – For any given year (i.e., “current year”), a dropout is a student who (1) was enrolled at the end of the previous year (therefore expected to return in the current year) and does not enroll on or before October 1 of the current year, and therefore becomes a current year dropout; or (2) a student who attended school at any point in the current year, and then exits (during the current year), and who does not re-enter school on or before October 1 of following year, and therefore becomes a current year dropout.

Dual Enrollment – Institutional Responsibilities for the Enrollment of Students Across Multiple Institutions: Dual Enrollment: The simultaneous enrollment of a student at both a secondary and a postsecondary institution (BOR Academic Affairs Policy 2.19).

Early Admissions – A policy under which students who have not completed high school are admitted to and enrolled full-time in college, usually after completion of their junior year (IPEDS).

Early College – Early College refers to high schools where students earn both a high school diploma and two years of college credit toward a college degree. (Gates Foundation).

GED – This term normally refers to the tests of General Educational Development (GED), which provide an opportunity to earn a high school credential. The GED program, sponsored by the American Council on Education, enables individuals to demonstrate that they have acquired a level of learning comparable to that of high school graduates (IPEDS).

Industry-based Certification (IBC) – An IBC is tangible evidence that an individual has successfully demonstrated skill competencies in a specific set of work-related tasks, a single occupational area, or a cluster of related occupational areas as recognized by the specific industry and verified by successful completion of required assessment components.

LA ePortal – A lifelong learning college and career preparation tool designed to assist a variety of individuals along the education and workforce continuum. Whether completing an individual graduation plan, creating a professional resume, searching for a college or university, taking career assessments, or exploring job opportunities, there is something for everyone. The LA ePortal facilitates academic and career pursuits to assist citizens in the many transitions they encounter in life. Log in @ www.LAePortal.com.
**Life Experience Credit** – College units awarded based upon prior learning as formally documented by a recognized evaluation process such as the Council for Adult and Experiential Learning (CAEL).

**Middle College** – The creative delivery of curriculum and pedagogy in which students take high school and college courses on a college campus while still in high school, pursuing both Carnegie and post-secondary credit. Typically, the Middle College is a comprehensive high school that is incorporated within the administrative structure of the postsecondary institution.

**Potential Dropout** – A student with a single factor or multiple factors that impede the student’s progress and increase the probability that the student’s academic pursuits may be interrupted, including but not limited to frequent absenteeism, repeated discipline infractions, students who are more that two grade levels behind, students enrolled in the pre-GED/Skills Options Program, families being served by FINS/CASA, and other factors and/or subgroups recognized in or by federal legislation.

**Registered Apprenticeship** – Registered Apprenticeship is a rigorous “earn while you learn” model that provides a combination of on-the-job learning and related classroom instruction in which workers learn the practical and theoretical aspects of a highly skilled occupation. When a registered apprentice graduates from a program, he or she receives an apprenticeship completion certificate, issued by the State of Louisiana and United States Department of Labor. It is highly regarded, portable and recognizable throughout the U.S. Apprenticeship programs are sponsored by joint employer and labor groups, individual employers and/or employer associations. Currently the national Registered Apprenticeship system includes a network of approximately 30,000 program sponsors nationwide, offering more than 1,000 different career opportunities.

**Success Through Articulation (STArt)** – A joint initiative between the Board of Regents, Department of Education, and LCTCS designed to provide secondary students with the opportunity to take classes for articulated credit while in high school, for which they will receive postsecondary credit once they enroll into college.

**Technical Competency Area (TCA)** – An applied course or a series of courses (1 – 12 hours). A TCA provides a student with a specific technical competency. TCAs are strictly limited to technical and community colleges. Approval authority for implementation of a TCA shall reside with the appropriate management board or their designated staff.

**Tech Prep** – Tech Prep is a federally funded initiative (Carl D. Perkins). Tech Prep programs focus on articulation between secondary and post-secondary vocational-technical educational institutions designed to ease the transition between secondary instruction and advanced technical programs with required proficiency in mathematics, science, communication, and technologies to lead to an associate degree or certificate in specific career fields.

**Transfer** – A student who enrolls at an institution for the first time who has previously attended another postsecondary institution. (BOR Statewide Student Profile System)

Top Demand Jobs by Region

Region 1
- Registered Nurses
- General and Operations Managers
- Sales Representatives, Wholesale and Manufacturing, Except Technical and Scientific Products
- Elementary School Teachers, Except Special Education
- First-Line Supervisors/Managers of Retail Sales Workers
- Licensed Practical and Licensed Vocational Nurses
- Bookkeeping, Accounting, and Auditing Clerks
- Network Systems and Data Communications Analysts

Region 2
- Registered Nurses
- Elementary School Teachers, Except Special Education
- First-Line Supervisors/Managers of Retail Sales Workers
- General and Operations Managers
- Sales Representatives, Wholesale and Manufacturing, Except Technical and Scientific Products
- Bookkeeping, Accounting, and Auditing Clerks
- Licensed Practical and Licensed Vocational Nurses
- First-Line Supervisors/Managers of Office and Administrative Support Workers
- Truck Drivers, Heavy and Tractor-Trailer

Region 3
- Captains, Mates, and Pilots of Water Vessels
- Sailors and Marine Oilers
- Welders, Cutters, Solderers, and Brazers
- Elementary School Teachers, Except Special Education
- Truck Drivers, Heavy and Tractor-Trailer
- Registered Nurses
- General and Operations Managers
- Plumbers, Pipefitters, and Steamfitters
- Ship Engineers
- Machinists

Region 4
- Registered Nurses
- Welders, Cutters, Solderers, and Brazers
- General and Operations Managers
- Elementary School Teachers, Except Special Education
- First-Line Supervisors/Managers of Retail Sales Workers
- Licensed Practical and Licensed Vocational Nurses
- Truck Drivers, Heavy and Tractor-Trailer
- Industrial Machinery Mechanics
- Licensed Practical and Licensed Vocational Nurses

Region 5
- Registered Nurses
- Elementary School Teachers, Except Special Education
- Welders, Cutters, Solderers, and Brazers
- Truck Drivers, Heavy and Tractor-Trailer
- General and Operations Managers
- Licensed Practical and Licensed Vocational Nurses
- First-Line Supervisors/Managers of Retail Sales Workers
- Secondary School Teachers, Except Special and Vocational Education
- Correctional Officers and Jailers

Region 6
- Registered Nurses
- Correctional Officers and Jailers
- Elementary School Teachers, Except Special Education
- General and Operations Managers
- Licensed Practical and Licensed Vocational Nurses
- First-Line Supervisors/Managers of Retail Sales Workers
- Secondary School Teachers, Except Special and Vocational Education
- Truck Drivers, Heavy and Tractor-Trailer

Region 7
- Registered Nurses
- Elementary School Teachers, Except Special Education
- General and Operations Managers
- Licensed Practical and Licensed Vocational Nurses
- First-Line Supervisors/Managers of Retail Sales Workers
- Truck Drivers, Heavy and Tractor-Trailer
- Bookkeeping, Accounting, and Auditing Clerks
- First-Line Supervisors/Managers of Office and Administrative Support Workers

Region 8
- Registered Nurses
- General and Operations Managers
- Elementary School Teachers, Except Special Education
- Licensed Practical and Licensed Vocational Nurses
- First-Line Supervisors/Managers of Retail Sales Workers
- Correctional Officers and Jailers
- First-Line Supervisors/Managers of Office and Administrative Support Workers
- Carpenters

9th Grade Initiative
The 9th Grade Initiative supports the transition from 8th to 9th grade through increased personalization, developing skills for high school success, and encouraging education and career planning.

High Schools That Work/ Making Middle Grades Work [http://www.hsmgw.org]
HSTW/MMGW provides effort-based school improvement initiatives designed by the Southern Regional Educational Board (SREB) to high school and middle grades leaders and teachers for the purpose of raising student achievement school-wide.

Career and Technical Education [cte]
CTE programs provide all students a challenging, relevant, meaningful, and seamless education that will help them become lifelong learners and productive citizens of the 21st Century. Our goal is to increase Dual Enrollment, Industry Based Certifications (IBCs), and Work-Based Learning Opportunities for secondary students.

Credit Recovery
Credit Recovery provides an opportunity for on-time promotion of students to the 9th and 10th grades, keeping students on track for graduation, and reducing the number of dropouts. Programs serve both to prevent students from failing courses and to help students recover credit after they have failed a course.

Adolescent Literacy
Louisiana’s Adolescent Literacy Plan describes the essential elements and key actions important to improving and advancing literacy in the upper grades. Elements focus on job-embedded professional development, reading and writing in all content areas, data-driven instruction, strategic intervention, and collaborative leadership.

Jobs for America’s Graduates Louisiana [JAG-LA]
JAG-LA is an affiliate of the Jobs for America’s Graduates Program (JAG), the nation’s largest dropout prevention and recovery program serving youth 12-21 years of age. JAG-LA provides an educational setting that promotes academic and skills attainment, civic responsibility, leadership development and social awareness which are necessary to become a responsible citizen and productive worker.

Initiative to Transform Professional School Counseling
This initiative provides professional development so that high schools can design a comprehensive school counseling program that effectively meets the academic, career, and personal/social needs of every child.

Senior Project®
Senior Project® is a four-component, student-driven program for high school seniors that prepares them for both college and career. Students may receive an academic or career-tech endorsement through Senior Project®, which adds to the School Performance Scores of their schools.

Louisiana’s Comprehensive Learning Supports System
Louisiana’s Comprehensive Learning Supports System is a comprehensive and systemic approach to ensuring all students have equal opportunity to succeed at school. Learning Supports are the resources, strategies, and practices that provide physical, social, and emotional support to directly address barriers to learning and teaching and to re-engage disconnected students.

Louisiana Career Clusters

Agriculture, Food & Natural Resources
The production, processing, marketing, distribution, financing, and development of agricultural commodities and resources. Mining and mineral extraction are included in the Agriculture, Food & Natural Resources cluster.

Architecture & Construction
Careers in designing, planning, managing, building, and maintaining the built environment.

Arts, A/V Technology & Communications
Designing, producing, exhibiting, performing, writing, and publishing multi-media content including visual and performing arts and design, journalism, and entertainment services.

Business Management & Administration
Business Management & Administration careers encompass planning, organizing, directing, and evaluating business functions essential to efficient and productive business operations. Business Management & Administration career opportunities are available in every sector of the economy.

Education & Training
Planning, managing, and providing education and training services, and related learning support services.

Finance
Planning, services for financial and investment planning, banking, insurance, and business financial management.

Government & Public Administration
Executing governmental functions to include Governance; National Security; Foreign Service; Planning; Revenue and Taxation; Regulation; and Management and Administration of the local, state, and federal levels.

Health Services
Planning, managing, and providing therapeutic services, diagnostic services, health informatics, support services, and biotechnology research and development.

Hospitality & Tourism
Hospitality & Tourism encompasses the management, marketing, and operations of restaurants and other food services, lodging, attractions, recreation events, and travel-related services.

Human Services
Preparing individuals for employment in career pathways that relate to families and human needs.

Information Technology
Building linkages in IT occupations framework: for entry level, technical, and professional careers related to the design, development, support, and management of hardware, software, multi-media, and systems integration services.

Manufacturing
Planning, managing, and performing the processing of materials into intermediate or final products and related professional and technical support activities such as production planning and control, maintenance, and manufacturing/ process engineering.

Marketing
Planning, managing, and performing marketing activities to reach organizational objectives.

Planning, Management & Logistics
Planning, management, and movement of people, materials, and goods by road, pipeline, air, rail, and water and related professional and technical support services such as transportation infrastructure planning and management, logistics services, mobile equipment and facility maintenance.
